<u>Coronavirus (COVID-19) - Latest updates, precautionary measures, and travel advice</u> <u>COVID-19 Vaccine Registration</u>

Coronavirus (COVID-19) update

The current World Health Organization risk assessment for novel coronavirus (COVID-19) is very high risk globally. It is advised that all countries prepare for the possibility of COVID-19 in their communities. Everyone has a role to play in getting ready and staying healthy by practicing everyday prevention measures like frequent hand washing, staying home when sick and covering coughs and sneezes. The World Health Organization has declared the current coronavirus situation as a pandemic. A pandemic is the increased and sustained transmission of a disease across many countries.

Surveillance for respiratory illness has been enhanced in collaboration with local public health partners. Persons with respiratory illness including fever and cough should <u>call ahead</u> and inform their health care provider of their travel history prior to attending for medical care.

This is a rapidly changing situation. Please regularly check this page for updates.

COVID-19 Dashboard 11 February 2021 🚣

You can view our interactive COVID dashboardhere.

Data as of 10th February 2021

COVID-19 Testing	Total
Total	168422
Results negative	167728
Results positive	694
Transmission Status of Confirmed Cases	
Imported	201
Local Transmission [Known contact/source]	401
Local Transmission [Unknown contact/source]	90
Under Investigation	2
Status of Confirmed Cases	
Recovered	675
Active (non-hospitalized)	4

Active (hospitalized)	3
Deceased	12

Imported: Cases acquired outside of Bermuda.

Local transmission: Cases acquired within Bermuda

Under investigation: Type of transmission has not yet been determined. These cases are not imported and are likely the result of local transmission.

Recovered: Case has had no fever for at least 72 hours (3 days) without the use of fever-reducing medication, other symptoms have improved, at least 14 days have passed since onset of symptoms or testing date and there is laboratory confirmation of at least one negative result.

Deceased: Case has died without a clear alternative cause of death that cannot be related to COVID disease (e.g. trauma) with no period of complete recovery from COVID-19 between illness and death.

Country status: Sporadic cases

COVID-19 Reopening Indicators

Bermuda is monitoring critical indicators to see how we are doing in managing COVID-19 and assess our readiness to move to the next phase of our reopening plan. These indicators are updated on Tuesdays.
