As of 1:00pm ET, June 14

New Jersey COVID-19 Information Hub

Positive‡	166881
Deaths	12625
Total tests	1097616

- Confirmed Case Summary
  Mortality Data Trends
- Department of Health COVID-19 home page >

‡ Includes deaths and results reported by state, commercial and medical center laboratories

* The total number of tests that have been reported to the New Jersey Department of Health using PCR, the most widely used viral testing method. It is not a count of how many people have been tested. Some persons have been tested multiple times, while some tests produce inconclusive results and need to be repeated. Additionally, about 20 percent of the tests performed on New Jersey residents, particularly persons who were tested at private facilities, have been processed by laboratories that are not known to consistently report negative results.

Commissioner Persichilli: Get Tested, Respond When Contact Tracers Call

In an op-ed for the USA Today Network, New Jersey Health Commissioner Judy Persichilli cautions that COVID-19 is still with us and that New Jersey residents must remain vigiliant to prevent a resurgence of the virus.
