## COVID-19 and ethnicity

### Total cases and tests by ethnicity

|                 | Total cases since first NZ case | Total tests for COVID-19 to date |
|-----------------|---------------------------------|----------------------------------|
| Māori           | 210                             | 318,001                          |
| Pacific peoples | 201                             | 279,017                          |
| Asian           | 707                             | 396,900                          |
| European/other  | 1,647                           | 1,274,701                        |
| Unknown         | 29                              | 111,504                          |
| Total           | 2,794                           | 2,380,123                        |

Note: This table shows the number of tests, and some people are tested more than once.

### Cases by ethnicity

#### Cases of COVID-19 by ethnicity

| Ethnicity*   | Active (confirmed and probable) | Recovered   | Deceased  | Total cases since first case | Percentage of all cases |
|--|---------------------------------|-------------|-----------|------------------------------|-------------------------|
| Māori  | 0                               | 205         | 5         | 210                          | 7.5%                    |
| Pacific peoples                                    | 1                               | 199         | 1         | 201                          | 7.2%                    |
| Asian  | 15                              | 692         | 0         | 707                          | 25.3%                   |
| Middle Eastern, Latin American and African (MELAA) | 6                               | 131         | 2         | 139                          | 5%                      |
| European or Other                                  | 9                               | 1481        | 18        | 1508                         | 54%                     |
| Unknown  | 14                              | 15          | 0         | 29                           | 1%                      |
| <b>Total</b>                                       | <b>45</b>                       | <b>2723</b> | <b>26</b> | <b>2794</b>                  | <b>100%</b>             |

\* The prioritised ethnicity classification system is used in this table and below. This means each person is allocated to a single ethnic group, based on the ethnic groups they identify with. Where people identify with more than one group, they are assigned in this order of priority: Māori, Pacific Peoples, Asian, and European/Other. So, if a person identifies as being Māori and New Zealand European, the person is counted as Māori. See [Ngā tapuae me ngā raraunga: Methods and data sources](#) for further information.

The data categorized by ethnicity come from National Health Index (NHI) data collection, linked to data held in the EpiSurv database.

## COVID-19 by age and sex

### Cases by age

### COVID-19 cases by age group

| Age group    | Active (confirmed and probable) | Recovered   | Deceased  | Total cases | Percentage of all cases |
|--------------|---------------------------------|-------------|-----------|-------------|-------------------------|
| 0 to 9       | 6                               | 141         | 0         | 147         | 5.3%                    |
| 10 to 19     | 2                               | 236         | 0         | 238         | 8.5%                    |
| 20 to 29     | 11                              | 661         | 0         | 672         | 24.1%                   |
| 30 to 39     | 10                              | 560         | 0         | 570         | 20.4%                   |
| 40 to 49     | 9                               | 386         | 0         | 395         | 14.1%                   |
| 50 to 59     | 5                               | 379         | 3         | 387         | 13.9%                   |
| 60 to 69     | 1                               | 239         | 3         | 243         | 8.7%                    |
| 70 to 79     | 1                               | 91          | 7         | 99          | 3.5%                    |
| 80 to 89     | 0                               | 26          | 8         | 34          | 1.2%                    |
| 90+          | 0                               | 4           | 5         | 9           | 0.3%                    |
| <b>Total</b> | <b>45</b>                       | <b>2723</b> | <b>26</b> | <b>2794</b> | <b>100%</b>             |

### Cases by sex

#### Total cases of COVID-19 by sex

| Sex          | Active (confirmed and probable) | Recovered   | Deceased  | Total cases | Percentage of all cases |
|--------------|---------------------------------|-------------|-----------|-------------|-------------------------|
| Female       | 12                              | 1369        | 12        | 1393        | 50%                     |
| Male         | 31                              | 1353        | 14        | 1398        | 50%                     |
| Unknown      | 2                               | 1           | 0         | 3           | 0%                      |
| <b>Total</b> | <b>45</b>                       | <b>2723</b> | <b>26</b> | <b>2794</b> | <b>100%</b>             |

### Cases by hospitalisation and intensive care

#### Cases in hospital and in intensive care (ICU) by age

| Age group | Total people hospitalised | Total people in ICU |
|-----------|---------------------------|---------------------|
| 0 to 9    | 1                         | 0                   |
| 10 to 19  | 3                         | 1                   |
| 20 to 29  | 7                         | 1                   |
| 30 to 39  | 18                        | 2                   |

| Age group    | Total people hospitalised | Total people in ICU |
|--------------|---------------------------|---------------------|
| 40 to 49     | 17                        | 3                   |
| 50 to 59     | 30                        | 4                   |
| 60 to 69     | 25                        | 4                   |
| 70 to 79     | 18                        | 4                   |
| 80 to 89     | 8                         | 0                   |
| 90+          | 4                         | 0                   |
| <b>Total</b> | <b>131</b>                | <b>19</b>           |

#### Cases in hospital and in intensive care by sex

| Sex          | Total people hospitalised | Total people in ICU |
|--------------|---------------------------|---------------------|
| Female       | 66                        | 6                   |
| Male         | 65                        | 13                  |
| <b>Total</b> | <b>131</b>                | <b>19</b>           |

Note: To protect privacy ICU status has not been updated since June 15, 2021

## Details of past cases

We publish details about every person with COVID-19 (confirmed or probable) in a downloadable spreadsheet below. For privacy reasons, this data only includes:

- Date potential case was notified
- Sex of case
- Age group of case
- DHB where the case lives - listed as "Managed isolation & quarantine" for border cases
- If the case is related to overseas travel

This file covers all cases from 26 February 2020 to 15 July 2021.

[COVID-19 case details through 15 July 2021 \(CSV, 197 KB\)](#)

Researchers can request detailed data on COVID-19 in New Zealand by sending an email to the Ministry of Health COVID-19 Response and Coordination team - [\[email protected\]](#)
