Current situation in Switzerland

Confirmed in Switzerland, 24.3.2020, 12.15 pm:

Infected: 8836 people Died: 86 people

The top priority for the Swiss Federal Council is the health of the public

The aim should be to make sure that people are better protected from the novel coronavirus, especially those who are at a higher risk of becoming severely ill. We can all help by following the recommendations (both the new ones and those issued previously):

- Keep your distance for example: Protect elderly people by keeping adequate distance from them; Keep your distance when queuing or waiting in line; Keep your distance at meetings.
- Wash your hands thoroughly.
- Avoid shaking hands.
- Cough and sneeze into a tissue or the crook of your arm.
- If you have a fever and are coughing, stay at home.
- Only go to the doctor or A&E once you have notified them by phone.

You will find detailed information on the "Protect yourself and others" site or at www.foph-coronavirus .

Current situation - International

As of 24 March 2020, 7 am

Cases of new coronavirus infections have been confirmed in more than 170 countries or regions.

Italy:

Infected: more than 63,500 people

Died: 6,077 people

Globally:

Infected: more than 381,050 people **Died:** more than 16,500 people

In the majority of cases the illness is mild. However, people aged over 65 and those with an existing pre-illnesscould become seriously ill.

Affected areas: why is reference no longer being made to 'affected areas'?

There is now a risk of becoming infected with new coronavirus in almost all parts of the world.	As of 9 March we will therefore no longer be referring to
'affected areas'.
