# COVID-19 North Carolina Dashboard

The number of new COVID-19 cases on the NCDHHS COVID-19 Data Dashboard for Feb. 3, 2021 includes a large number of cases from tests performed at FastMed Urgent Care clinics during December 2020 and January 2021 that had not been previously reported to NCDHHS. These delayed reports account for 7,912 of the 12,079 COVID-19 cases reported today. Because the NCDHHS COVID-19 Data Dashboard displays the net difference in cases from the prior day, the number of cases reported today is inflated due to this backlog in reporting. It is important to note this delay in reporting to NCDHHS did not impact patient notifications or care from FastMed.
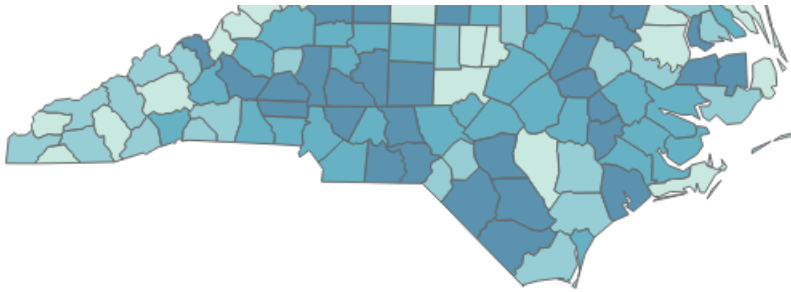

Knowing when to dial up or down measures that slow the spread of the virus depends on North Carolina's testing, tracing and trends. This dashboard provides an overview on the metrics and capacities that the state is following.

Updated daily by approximately 12:00 p.m. Last updated February 3, 2021 at 12:30 p.m.
