What You Need to Know Now

As Health Commissioner Mark Levine, MD said earlier this week, we are in the very first stages of vaccine production and distribution to the states, and there will likely be a limited supply of vaccine early on. Meanwhile, cases of COVID-19 continue to increase in Vermont.

We all need to continue to do our part to prevent illness and spread of the virus in our communities. You can find the latest information, recommendations and resources from the Health Department at healthvermont.gov/covid19:

- Wear a mask and keep a 6-foot distance from anyone outside your household.
- Do not get together or socialize with anyone you don’t live with (see more details [here](#)).
- Avoid traveling when possible, even within Vermont. Anyone who travels to or from Vermont must [quarantine](#). The only exception is for [essential travel](#).
- If you’re sick, stay home.
- Even mild [symptoms](#) (like a headache or dry cough) could be signs of COVID-19. Talk to your health care provider about getting tested, and stay home while waiting for your result.
- Learn more about [who should get tested](#) and find a test site near you.

Take Care of Your Emotional and Mental Health

If you or someone you know is in crisis or needs emotional support, help is available 24/7:

- Call your [local mental health crisis line](#).
- Text VT to 741741 to talk with someone at the [Crisis Text Line](#).
- Call the [National Suicide Prevention Lifeline](#) at 1-800-273-8255.
- For more information visit healthvermont.gov/suicide.

- Visit our [Coping With Stress](#) web page.
- Get connected to Alcohol and Drug Support Services at [VT Helplink](#).
- Get self-help tips and connect to mental health services at [COVID Support VT](#).

Need to be connected to food resources?

One in three Vermonters are at risk for food insecurity, struggling to find help feeding their families.

If your financial situation has recently changed, you may now qualify for Vermont nutrition and food programs. They include: WIC program (Women, Infants and Children), 3SquaresVT/SNAP, and more. Newer programs such as Farmers to Families and Everyone Eats are helping to fill the gaps. All these programs can help keep healthy food on the table.

Contact the [Health Department](#), [Hunger Free Vermont](#), or call 2-1-1 for more information.

New at healthvermont.gov

Outbreaks associated with social gatherings and events in October led to increases in cases throughout the state, and ultimately impacted our most vulnerable settings. Learn more in the latest [Weekly Data Summary Spotlight](#).

[The new map](#) of town-level COVID-19 activity shows the **rate of cases of COVID-19** among Vermont residents per 10,000 people, by town of residence during the past two weeks. This change offers a more current view of what’s happening, on a rolling basis. The map also includes a table that shows cumulative town counts since March. The map and the table are updated weekly.

Case Information

Current COVID-19 Activity in Vermont
As of 12 p.m. on December 9, 2020

Description	Number
New cases*	105 (5,285 total)
