Current status

Last updated 10:00pm AESTDST, 13 March 2020.

The World Health Organization (WHO) has announced that COVID-19 is a pandemic.

Currently, Australia does not have widespread community transmission of COVID-19. To help slow the spread, the Australian Government has advised, effective from Monday 16 March, that organised, non-essential gatherings should be limited to 500 people.

Non-essential meetings or conferences of critical workforces, such as health care professionals and emergency services, should also be limited. This advice does not include workplaces, schools, universities, shops, supermarkets, public transport and airports.

To protect vulnerable Australians, the Government has also advised reducing visitors to all residential aged care facilities and remote Aboriginal and Torres Strait Islander communities.

The Australian Government is implementing an economic response to the coronavirus totalling \$17.6 billion across the forward estimates. The package is designed to protect the economy by maintaining confidence, supporting investment and keeping people in jobs.

The Government is also delivering a [comprehensive \\$2.4 billion health package](#) to protect all Australians, including vulnerable groups such as the elderly, those with chronic conditions and

Indigenous communities, from the coronavirus (COVID-19).

The [Australian Government has secured additional surgical, P2 and N95 masks](#) for the National Medical Stockpile, for medical and aged care professionals to care for patients with suspected or confirmed cases of COVID-19.

The Prime Minister has announced the [activation of the Australian Health Sector Emergency Response Plan for Novel Coronavirus \(COVID-19\)](#).

For more information, read the latest [transcripts and media releases](#) from our Chief Medical Officer and our Deputy Chief Medical Officer about coronavirus (COVID-19) in our [news section](#).

You can also see updates in media releases and transcripts from [Minister Hunt relating to coronavirus on the Health Ministers' site](#).

In Australia

As at 11:00 hrs on 13 March 2020, there were 156 confirmed cases of coronavirus (COVID-19), including 3 deaths, in Australia.

- 1 in Australian Capital Territory
- 77 in New South Wales
- 24 in Queensland
- 11 in South Australia
- 3 in Tasmania
- 23 in Victoria*
- 7 in Western Australia
- 10 associated with the Diamond Princess cruise ship

* Note: Victoria case count includes a case detected in NSW. Under the National Notifiable Diseases Surveillance System reporting requirements the case is considered a Victorian case.

Further details:

- 15 of the initially reported cases in Australia all had a direct or indirect travel history to Wuhan, China
- 10 cases, including 1 death, are associated with the Diamond Princess cruise ship repatriation flight from Japan
- 18 cases are reported to have had a direct or indirect travel link to Iran
- 70 cases are reported to have had a direct or indirect travel link to countries including the United States of America, United Arab Emirates, the United Kingdom, Italy, Iceland, Singapore, Thailand, the Republic of Korea, Japan, Indonesia, Philippines, Taiwan, Cuba, Trinidad and Tobago, Nepal, Egypt, Austria, France, Spain, Hong Kong
- 29 cases, including 2 deaths, do not have a reported history of overseas travel

- 8 of these cases are associated with an aged care facility in NSW. 2 residents of this facility have sadly died
- 2 cases are either directly or indirectly associated with attendance at a workshop
- 19 cases are close contacts of known cases, with further details pending
- The likely place of exposure for a further 14 newly reported cases is under investigation

Of the 156 Australian cases reported, 26 of these cases are reported to have recovered.

For questions about testing or the welfare of people with the virus, contact your [state or territory health authority](#).

Across the world

Across the world, there have been more than 130,000 confirmed cases of coronavirus (COVID-19) and more than 4,800 reported deaths.

The majority of cases (80,981) and deaths (3,162) associated with COVID-19 have been reported from mainland China.

There have been more than 48,900 cases, including approximately 1,600 deaths, reported from 121 countries and regions outside mainland China.

The majority of deaths outside mainland China have been in Italy and Iran.

Mainland China continues to show a steady decline in the report of new cases with very few cases being reported in the past week.

The Republic of Korea appears to have reached a peak in its epidemic, with daily cases now declining.

The Islamic Republic of Iran and Italy continue to report large increases in cases.

Of confirmed cases reported globally, the case fatality rate is approximately 3.7%.

If you're planning any overseas travel, or have returned from an at risk country, see and follow the [travellers and visitors information](#) below.

Why is there an alert

On 30 January 2020, the [World Health Organization](#) declared the coronavirus outbreak a Public Health Emergency of International Concern.

On 27 February 2020, the Prime Minister announced the activation of the [Australian Health Sector Emergency Response Plan for Novel Coronavirus \(COVID-19\)](#)¹.

Australian Health Sector Emergency Response Plan for Novel Coronavirus (COVID-19)

The [Australian Health Sector Emergency Response Plan for Novel Coronavirus \(the COVID-19 Plan\)](#) was endorsed by the AHPPC on 17 February 2020.

The Australian Government will continue to monitor the emerging information and evidence closely. It will work with jurisdictions, through key committees and other relevant experts, to adapt the COVID-19 Plan as new information becomes available.

[Australian Health Sector Emergency Response Plan for Novel Coronavirus \(COVID-19\)](#)

The Australian Health Sector Emergency Response Plan for Novel Coronavirus (the COVID-19 Plan) guides the Australian health sector response.

If you are at risk

In Australia, the people most at risk of getting the virus are those who have recently been in in a [high risk country/region](#) and people who have been in close contact with someone who has a confirmed case of coronavirus.

If you have returned from a [country or region that is at higher risk for COVID-19](#) you can not attend work if you [work in a setting with vulnerable people](#)

From previous experience with other coronaviruses, other categories of people at most risk of serious infection are:

- people with compromised immune systems (e.g. cancer)
- elderly people
- Aboriginal and Torres Strait Islander people, as they have higher rates of chronic illness
- people with diagnosed chronic medical conditions
- very young children and babies*
- people in group residential settings
- people in detention facilities

*At this stage, the risk to children and babies, and the role children play in the transmission of COVID-19, is not clear. However, there has so far been a low rate of confirmed COVID-19 cases among children relative to the broader population.

Travellers and visitors

AHPPC advised that the current travel restrictions for people returning from mainland China, Iran, Republic of Korea and Italy are appropriate.

The Government will continue to follow the advice of AHPPC and will not be expanding travel restrictions at this time.

Further travel restrictions will not significantly help limit community transmission of COVID-19 in Australia.

Entering Australia

The Australian Government has travel restrictions in place for foreign nationals entering Australia from China, Iran, Korea and Italy.

As part of our ongoing strategy of containment and minimising risk to the Australian community, we are implementing additional screening of passengers at Australian airports.

Australian Border Force liaison officers at overseas airports will work with airlines to identify travellers who should not board.

Airlines will also be required to refuse uplift for anyone identified as being unwell.

Any passengers identified as unwell on the flight will be identified and referred for further assessment upon arrival.

Returning from higher risk areas

The Australian Government considers the following countries to be at higher risk for COVID-19:

- Mainland China
- Iran
- Italy
- Republic of Korea

There are travel restrictions for travellers from mainland China, Iran, Republic of Korea and Italy.

Foreign nationals will not be able to enter Australia within 14 days of being in these countries, with the exception of permanent residents, immediate family members of Australians, and airline crew.

If you are an Australian citizen returning from mainland China or Iran you should isolate yourself for 14 days after leaving mainland China or Iran.

If you are an Australian citizen travelling from the Republic of Korea, on or after 5 March, you must isolate yourself for 14 days from the time you left the Republic of Korea.

If you are an Australian citizen who left or transited through Italy on or after 11 March you must isolate yourself for 14 days from the time you left Italy.

This advice should be read in conjunction with the [What you need to know](#) and [Isolation guidance](#) information sheets.

Moderate risk

The Australian Government considers the following countries to be at moderate risk for COVID-19:

- Cambodia
- Indonesia
- Japan
- Singapore

- Thailand

If you have recently travelled to these countries, monitor your health for 14 days after leaving that country. If you develop a fever or cough, seek medical advice urgently and isolate yourself.

Advice for Australians travelling overseas

Travelling in the current context presents increased risks, including of significant travel disruptions and delays.

On Friday 13 March, the Australian Government advised people to reconsider any non-essential international travel.

The Department of Foreign Affairs and Trade (DFAT) has raised the level of advice for a number of countries. Conditions are changing rapidly and further updates are likely.

Anyone planning to travel should read [Smartraveller](#) advice for all destinations and transit points and subscribe for updates.

Australians on cruise ships

DFAT is providing consular assistance to Australians hospitalised and quarantined overseas because of COVID-19.

Grand Princess Cruise Ship

DFAT is waiting on advice on whether any of the four Australians on board the Grand Princess cruise ship, moored off the Californian coast, have contracted COVID-19.

The Australian Consulate-General in San Francisco stands ready to provide consular assistance to Australian citizens on board.

International students

Year 11 and 12 students

Year 11 and 12 students who remain in China (outside Hubei Province) due to Australian travel restrictions have been offered a strict pathway to resume their studies. This is in recognition of the importance of the final 2 years of school.

Students who are completing their senior secondary schooling can apply for an exemption to the 1 February 2020 COVID-19 travel restrictions applied to foreign nationals who have been in mainland China (except Hubei Province). The exemptions will be considered on a case by case basis.

Australian Border Force has [information for student visa holders](#)

We are delivering more Australian education services online and offshore for international students. To find out more and for support, go to [coronavirus updates for international](#)

[students](#) on the Study in Australia website.

What we are doing

Australia is well prepared.

Our first class health system includes mechanisms for early detection and effective management of cases and contacts. Our plans include a range of interventions to minimise transmission and mitigate the impact of the outbreak.

Australian Government agencies and state and territory governments are working together to coordinate an evidence-based response. This includes:

- applying [travel restrictions](#) to reduce the number of travellers from mainland China, Iran and the Republic of Korea. This evening a travel ban will be implemented for Italy
- applying a 14-day isolation period to people at risk of getting coronavirus
- continuing to screen travellers who arrive in Australia
- tracing coronavirus cases
- continuing with border surveillance
- providing information in English and Chinese based on the latest medical advice, including through [Facebook](#), [Twitter](#), Weibo, WeChat and Chinese newspapers
- applying enhanced border measures at international air and sea ports, including announcements and signs

P2 and surgical masks have been made available from the National Medical Stockpile as part of the Government's response to COVID-19. The Government is also investigating further sources of supply for personal protective equipment, both internationally and domestically.

State and territory health authorities are:

- testing anyone who shows symptoms of the virus
- monitoring close contacts of confirmed cases every day
