On this page

Current status

The World Health Organisation (WHO) has announced that COVID-19 is a pandemic.

Currently, Australia does not have widespread community transmission of COVID-19. Find out [how we are managing the outbreak](#) to slow the spread.

In Australia

As at 6.30am on 19 March 2020, there have been **565 confirmed cases** of COVID-19 in Australia. There have been 111 new cases since 6.30am yesterday.

| Location | Confirmed cases* |
|------------------------------|------------------|
| Australian Capital Territory | 3 |
| New South Wales | 265 |
| Northern Territory | 0 |
| Queensland | 94 |
| South Australia | 37 |
| Tasmania | 10 |
| Victoria | 121 |
| Western Australia | 35 |
| Total** | 565 |

*Note that under National Notifiable Diseases Surveillance System reporting requirements, cases are reported based on their Australian jurisdiction of residence rather than where they were detected. For example, a case reported previously in the NT in a NSW resident is counted in the national figures as a NSW case.

**Includes Diamond Princess repatriation cases: Qld (3), SA (1), Vic (4), WA (2, including 1 death)

Case details

Of the 565 confirmed cases in Australia, 46 have recovered and 6 have died from COVID-19.

259 cases were considered to be overseas acquired. Most of the overseas cases were acquired in the USA, Iran, Italy and the UK.

72 cases are contacts of previously confirmed cases.

The likely place of exposure for 206 reported cases is under investigation.

The source of infection for 28 cases is currently unknown.

Further information regarding the epidemiology of cases in Australia is provided in the [weekly epidemiology reports](#).

Across the world

Across the world there have been more than **204,700 confirmed cases** of COVID-19 and more than **8,400 deaths**.
