Current status

The World Health Organisation (WHO) has announced that COVID-19 is a pandemic.

Currently, Australia does not have widespread community transmission of COVID-19. Find out [how we are managing the outbreak](#) to slow the spread.

In Australia

As at 6.30am on 20 March 2020, there have been 709 **confirmed cases** of COVID-19 in Australia. There have been 144 new cases since 6.30am yesterday.

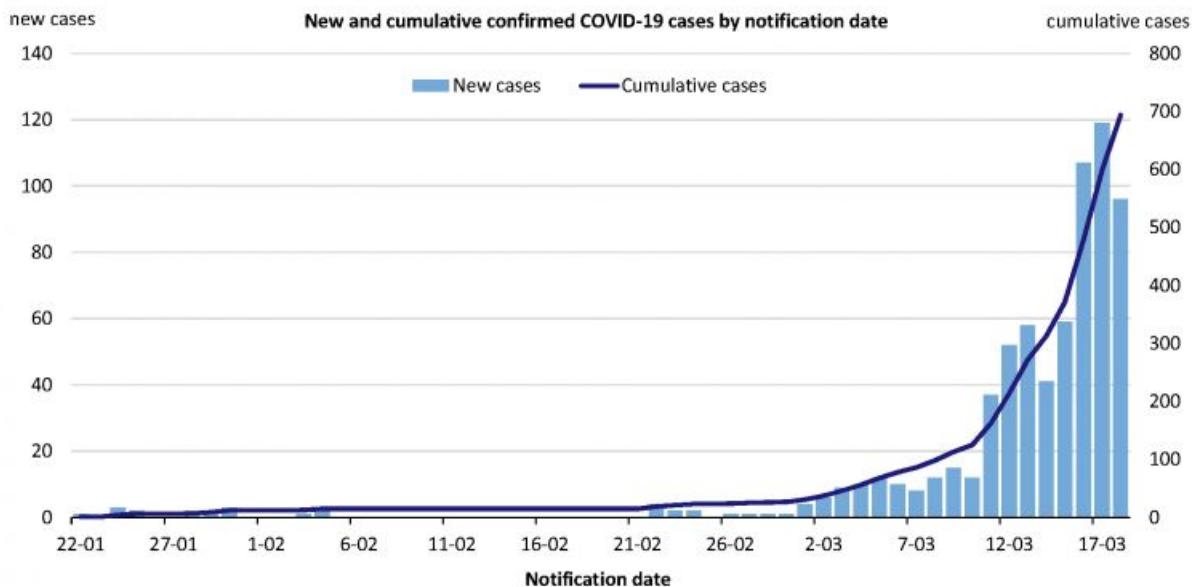

Location	Confirmed cases*
Australian Capital Territory	4
New South Wales	307
Northern Territory	0
Queensland	144
South Australia	42
Tasmania	10
Victoria	150
Western Australia	52
Total**	709

*Note that under National Notifiable Diseases Surveillance System reporting requirements, cases are reported based on their Australian jurisdiction of residence rather than where they were detected. For example, a case reported previously in the NT in a NSW resident is counted in the national figures as a NSW case.

**Includes Diamond Princess repatriation cases: Qld (3), SA (1), Vic (4), WA (2, including 1 death)

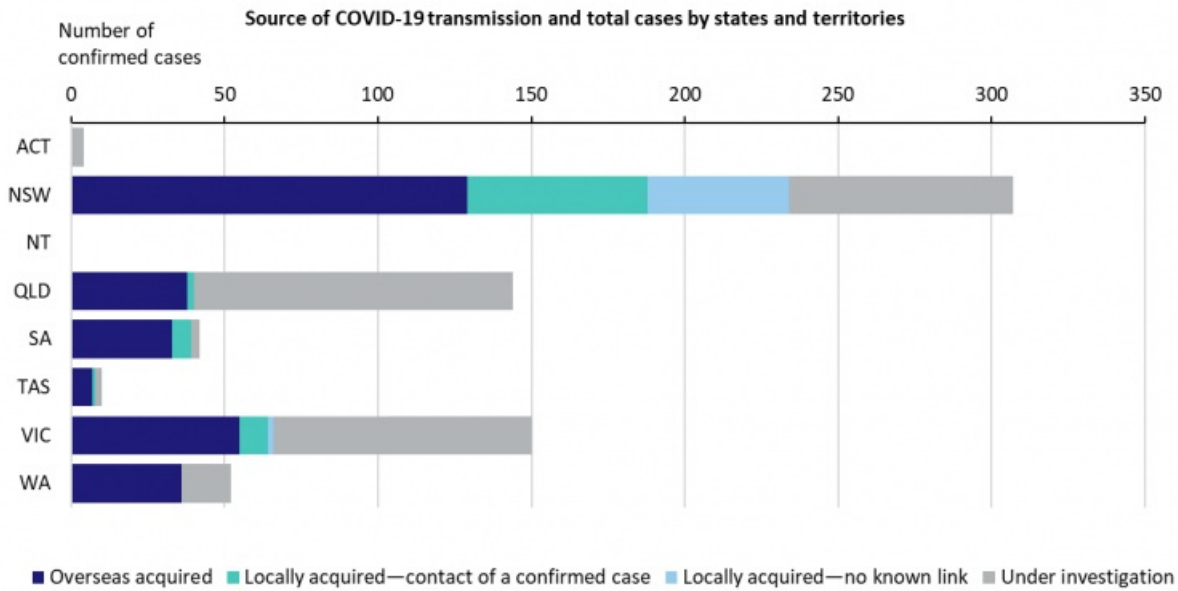

Of the 709 confirmed cases in Australia, 6 have died from COVID-19. Jurisdictions have tested over 100,000 people.

This graph shows the number of confirmed cases by notification date. Interpret the most recently reported new cases shown in the graph with caution as there can be delays in reporting.

[View text description and larger image of 'New and cumulative COVID-19 cases in Australia by notification date' graphic](#)

To date, most confirmed cases are considered to have been acquired overseas although a large proportion are still under investigation to understand the source of infection.

[View text description and larger image of 'COVID-19 cases in Australia by state and source of transmission' graphic](#)

The majority of Australian confirmed cases acquired overseas had a recent history of travel to Europe or the Americas, predominately the United States of America.

[View text description and larger image of 'COVID-19 cases acquired overseas – by region or country acquired' graphic](#)

Confirmed cases are seen across all age groups, with fewer cases reported in children and people over 70 years of age.

Data used in the overview are based on confirmed cases reported from jurisdictions to the National Notifiable Disease Surveillance System (NNDSS) at midnight 20 March 2020.

Further information regarding the epidemiology of cases in Australia is provided in the [weekly epidemiology reports](#).

Across the world

Across the world there have been more than **226,800 confirmed cases** of COVID-19 and more than **9,500 deaths**.

Find out how COVID-19 is affecting other countries on the [World Health Organisation \(WHO\) website](#). View the:
