## On this page

## Current status

The World Health Organization (WHO) has announced that COVID-19 is a pandemic.

Currently, Australia does not have widespread community transmission of COVID-19. Find out [how we are managing the outbreak](#) to slow the spread.

### [Coronavirus \(COVID-19\) at a glance](#)

This infographic provides a quick view of the current coronavirus (COVID-19) situation in Australia. We update it every afternoon based on the data we receive by 3.00pm from states and territories.

## In Australia

As at 3:00pm on 20 April 2020, there have been 6,619 confirmed cases of COVID-19 in Australia. There have been 26 new cases since 3:00pm yesterday.

Of the 6,619 confirmed cases in Australia, 71 have died and 4,258 have been reported as recovered from COVID-19. More than 431,000 tests have been conducted across Australia.

Location	Confirmed cases*
Australian Capital Territory	104
New South Wales	2,963
Northern Territory	27
Queensland	1,019
South Australia	435
Tasmania	197
Victoria	1,329
Western Australia	545
<b>Total</b>	<b>6,619</b>

\* Note that under National Notifiable Diseases Surveillance System reporting requirements, cases are reported based on their Australian jurisdiction of residence rather than where they were detected. For example, a case reported previously in the NT in a NSW resident is counted in the national figures as a NSW case.

## Daily overview of cases

Data used in the daily overview are updated every afternoon based on the data we receive by 3.00pm from states and territories.

To date, the majority of confirmed cases in all states were acquired overseas.

[View text description and larger image of 'COVID-19 cases in Australia by state and source of transmission' graphic.](#)

The majority of Australian confirmed cases acquired their infection overseas, including on board cruise ships or associated with recent travel to Europe or the Americas.

[View text description and larger image of 'COVID-19 cases acquired overseas – by region or country acquired' graphic.](#)

Confirmed cases are seen across all age groups.

Further information regarding the epidemiology of cases in Australia is provided in the [weekly epidemiology reports](#).

## Tracing contact with confirmed cases from flights

States and territories are publishing details of flights where we now know that confirmed cases were on board.

You can check these lists to see whether you may have been in contact with a confirmed case.

See our [advice for travellers](#) page for more details.

## Across the world

Across the world there have been more than **2.4 million confirmed cases** of COVID-19 and more than **165,000 deaths**.

Find out how COVID-19 is affecting other countries on the [World Health Organization \(WHO\) website](#). View the:
