20-29	36	36	72
30-39	55	48	103
40-49	34	48	82
50-59	34	37	71
60-69	25	37	62
70-79	10	7	17
80-89	2	5	7
90-100	4	0	4

*A single male case without a recorded date of birth has been notified and is currently being followed up.

Likely source of infection of confirmed cases reported in NSW

Source	Number of cases
Overseas acquired	218
Epi link (contact of confirmed case)	92
Under investigation	74
Unknown	52
Total	436

Confirmed cases by local health district (LHD), across NSW

This map shows confirmed COVID-19 cases only (based on location of usual residence). Cases without a NSW residential address are not shown. The case definition of a confirmed case is a person who tests positive to a validated specific SARS-CoV-2 nucleic acid test or has the virus identified by electron microscopy or viral culture, at a reference laboratory.

Confirmed cases by local health district (LHD), across Sydney Metropolitan region

This map shows confirmed COVID-19 cases only (based on location of usual residence). Cases without a NSW residential address are not shown. The case definition of a confirmed case is a person who tests positive to a validated specific SARS-CoV-2 nucleic acid test or has the virus identified by electron microscopy or viral culture, at a reference laboratory.

Airport screening

Since 2 February 2020, NSW Health been assisting the Australian Government in assessing passengers who arrive at Sydney International Airport from countries with high levels of COVID-19 community transmission. Up to 6pm 19 March 2020, a total of 28,517 passenger arrivals have been screened for possible symptoms of COVID-19. This includes 302 passengers screened on 19 March.

A total of 173 people have been transferred to hospital for further evaluation and COVID-19 testing where clinically indicated. This includes 5 people who arrived on 19 March.
