Note: The details on source of infection are subject to change as public health investigations and case interviews are ongoing.

Current COVID-19 clusters in NSW

This list includes locally-acquired clusters only; where a cluster represents 2 or more confirmed COVID-19 cases associated in location and time.

| Cluster | Date of first positive lab test | LGA | Last case within 14 days |
|--|--|--------------------------|--------------------------|
| Workplace in Lidcombe | 11 April 2020 | Parramatta | Yes |
| Anglicare Newmarch House | 10 April 2020 | Penrith | Yes |
| Workplace in Wolli Creek | 2 April 2020 | Bayside | Yes |
| Waverly Area Cluster | 2 April 2020 | Waverley Council | Yes |
| QF66 Johannesburg/Sydney arriving 27 March | 1 April 2020 | N/A | Yes |
| Workplace in Prestons | 29 March 2020 | Liverpool | Yes |
| QF28 Santiago/Sydney arriving 29 March | 26 March 2020 | N/A | Yes |
| Hunter Valley Event | 26 March 2020 | Cessnock | Yes |
| Gosford Hospital | 25 March 2020 | Gosford | Yes |
| Opal Aged Care Bankstown | 22 March 2020 | Canterbury- Bankstown | Yes |
| Chilean Navy | 21 March 2020 | Sydney | Yes : |
| Rose of Sharon Childcare Centre | 16 March 2020 | Blacktown | Yes : |

Notes: *represents the total number cases associated with the cluster diagnosed in NSW as at 10am 17 April 2020, presented in ranges of 1-10, 11-20 etc.

Airport screening

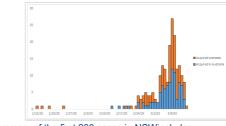

Since 2 February 2020, NSW Health been assisting the Australian Government in assessing passengers who arrive at Sydney International Airport from countries with high levels

of COVID-19 community transmission. On 16 April 2020, a total of 255 passenger arrivals were screened for possible symptoms of COVID-19. No one required transfer to hospital for further evaluation and COVID-19 testing.

To date, 52,159 passenger arrivals have been screened for possible symptoms of COVID-19. A total of 549 people have been transferred to hospital for further evaluation and COVID-19 testing where clinically indicated.

Summary of the first 200 cases in NSW

Summary of the first 200 cases in NSWincludes:

- demographics
- age distribution of the first 200 cases
- source of infection (overseas and within Australia)
- epicurve by country of acquisition (latest onset 15 March 2020)
- hospitalisation
- profile of symptomatic patients
- deaths.

Notes

This data includes confirmed COVID-19 cases only (based on location of usual residence). Cases without a NSW residential address are not shown. The case definition of a confirmed case is a person who tests positive to a validated specific SARS-CoV-2 nucleic acid test or has the virus identified by electron microscopy or viral culture, at a reference laboratory. The details on source of infection are subject to change as public health investigations and case interviews are ongoing. Case counts reported for a particular day may vary over time due to ongoing investigations and case review.
