- SA Pathology has conducted 30,922 COVID-19 laboratory tests
- SA's metropolitan COVID-19 clinics have conducted 10,105 tests

Source of infection in confirmed cases of COVID-19 in SA

Source	Cases
Overseas acquired	275
Locally acquired (close contact of a confirmed case)	97
Locally acquired (Interstate travel)	7
Locally acquired (contact not identified)	3
Under investigation	14
TOTAL	396

For public action

Investigations are ongoing into the cluster of cases identified earlier this week at Adelaide Airport. We have identified an additional two cases linked to close contacts of the baggage handlers, bringing the total cluster of cases to 19. The first case related to the cluster received a positive test result on 27 March.

Anyone who is sick with symptoms of COVID-19 and has been at the Adelaide Airport, including in the terminal or car park, since Tuesday 17 March should present for testing.

There are 34 confirmed cases linked to areas within the Barossa region including Tanunda, Nuriootpa, Williamstown, Angaston and Lyndoch.

Anyone in these areas from Saturday 14 March 2020 who develops symptoms should immediately self-isolate and be tested.

Travel in or out of these towns should now be limited and any non-essential travel within the region is discouraged. Anyone attending work should adhere to social distancing guidelines and working from home is encouraged.

A dedicated COVID-19 testing clinic has opened at Tanunda War Memorial Hospital for people in the region with symptoms of COVID-19.
