Coronavirus COVID-19 daily update

[Print](#)  [Share](#) 

This Chief Health Officer update is intended to provide clinicians and the Victorian public with information about the number of confirmed cases of COVID-19 in Victoria as well as relevant public health response activities in Victoria. Chief Health Officer Alerts will continue to be issued when there are changes to the public health advice related to COVID-19.

01/04/2020

What's new?

Developments in the outbreak

- As of 1 April 2020, Victoria has 968 total confirmed cases, 26 people are in hospitals including six people in intensive care. Four people have died. Almost two thirds of cases are directly linked to overseas travel, and 39 were locally acquired with no know link to overseas travel or another confirmed case. In total, 343 people have recovered.
- Of the total 968 cases, there have been 771 in metropolitan Melbourne and 183 in regional Victoria. A number of cases remain under investigation.
- This week, Australia's total exceeded 4000 cases. That is expected to increase significantly in coming weeks unless people stay at home.
- A CHO alert was issued today – see the full alert [here](#) .
- The case definition has changed. See the [Health services and general practice - coronavirus disease \(COVID-19\)](#) page for updated information, including new Quick Reference Guide and Guidelines for health services and general practitioners.
- Doctors, nurses, midwives and mental health professionals can deliver temporary Medicare Benefits Schedule and Department of Veterans' Affairs items via telehealth, provided those services are bulk billed.

- Doctors are encouraged to remind all patients that they should stay at home unless going to medical appointments or performing essential tasks.
- If testing health care workers, doctors are reminded to clearly mark pathology slips with 'HCW' to ensure the swabs can be easily identified for priority testing.
- Doctors are reminded to ensure they include a mobile contact number on pathology slips for patients who have been tested.
- Up-to-date [epidemiological data](#)  is available on our website.
- Physical (social) distancing measures should be consistently applied, if at all possible, including in clinical settings. The rule of 1 person for every 4 square metres must be maintained to ensure a safe physical distance.

Current directions arising from the declared state of emergency

- A [stay at home direction](#) was signed on 30 March 2020, ordering anyone in Victoria to stay at their usual place of residence, other than to work or study, buy essential goods or services, medical care or compassionate needs or exercise in accordance with public gathering guidelines. This direction replaces the Prohibited Gatherings direction.
- A [restricted activity direction](#) was signed on 30 March 2020, replacing the non-essential activity directions given on 25 March 2020. The new direction bans escort agencies and closes playgrounds, skateparks and outdoor communal gym equipment.
- A direction [to detain](#) all people arriving in Victoria on or after midnight was signed on 28 March 2020. This direction allows anyone arriving from overseas to be placed in mandatory quarantine for 14 days in a nominated accommodation facility. This direction supersedes the previous [airport and cruise ship directions](#), which have now been revoked.
- A direction for [non-essential activity \(No 2\)](#) was signed on 26 March 2020. This direction prohibits the operation of non-essential businesses and undertakings to slow the spread of coronavirus (COVID-19). These directions update the non-essential activity direction from 25 March.
- A [prohibited gatherings directions](#) was signed on 25 March 2020. This direction replaces the direction given on 22 March, adding two new categories, namely social sports gatherings and weddings and funerals.
- An [isolation \(diagnosis\) direction](#) was signed on 25 March 2020. This direction requires anyone diagnosed with coronavirus (COVID-19) to isolate at home or another suitable location to slow the spread of the disease.
- A direction for [hospital visitors](#) was signed on 23 March 2020. This direction prohibits non-essential visits to hospitals.
- This follows a direction for aged care, which was signed on 21 March 2020. The [Aged Care Directions](#) make provision for restricted access to residential aged care facilities to limit the spread of COVID-19 within a particularly vulnerable population.

Key messages

Investing in healthcare

The Victorian Government is investing \$1.3 billion in our healthcare sector to deliver additional capacity to manage the COVID-19 response. This will include:

- 4,000 ICU beds in addition to our existing 500 ICU beds
- \$1.2 billion will be invested in equipment and consumables
- \$65 million will be invested in capital works and workforce training
- Additional personal protective equipment including 551 million gloves, 100 million masks and 14.5 million gowns will be provided to healthcare professionals
- This funding is in addition to the \$537 million already invested in the healthcare system as part of the COVID 19 response.

Additional capacity is being delivered commencing with refurbishment of the old Peter MacCallum Cancer Centre.

New rules for overseas arrivals

- Two thirds of confirmed coronavirus (COVID-19) cases to date are a result of transmission from overseas arrivals to their close contacts.
- All travellers arriving into Australia from overseas will now be placed in quarantine for 14-days to slow the spread of coronavirus.
- Returning travellers are being housed in hotels, motels, caravan parks, and student accommodation.
- States and territories are enforcing the 14-day quarantine period with support from the Commonwealth and Australian Defence Force (ADF).
- The costs of accommodation, public health and security are being covered by each individual jurisdiction.
- Those in quarantine are receiving care packages of food and other essentials during this time.
- Travellers returning from overseas are being housed in the state or territory they initially arrive in for 14 days.
- Victoria currently has 5,000 hotel beds available for travellers returning from overseas and is working with the hospitality sector to ensure that adequate and appropriate accommodation is available.
- Each newly returned traveller in compulsory quarantine in a hotel is receiving a care package of food and other essentials.
- Skybus is supplying 85 buses to transfer people arriving at the airport to their accommodation.
- Note: all international passengers that arrived at a Victorian airport prior to 28 March 2020 must self-quarantine for 14 days.

Hospital and aged-care restrictions

- Emergency powers under the Public Health and Wellbeing Act 2008 have been enacted to limit visits to patients in hospitals to partners, parents or guardians or care and support people.
- And the following people are not allowed to visit a hospital:
 - recently returned travellers
 - a person who has a confirmed case of coronavirus (COVID-19)
 - a person who has been in contact with a person who has a confirmed case of coronavirus (COVID-19) or
 - a person with a high-temperature or symptoms of acute respiratory illness.
- Visits to residents of aged care facilities are now restricted to two people per day for a short duration. Exceptions to this rule will be made for people receiving palliative care.
- Children under the age of 16 will only be permitted to visit aged care facilities in exceptional circumstances.
- These directions will be enforced by the Commonwealth Government.

Supporting healthcare workers

- It's everyone's responsibility to support essential healthcare workers – such as doctors and nurses – to stay at work during the coronavirus (COVID-19) outbreak.
- Healthcare workers may need extra help to ensure their children have care so they can work during this period.
- Where possible, partners of essential healthcare workers – who are not healthcare workers themselves – should support them to continue working by taking care of children.
- Older people – such as grandparents – and other at-risk groups should not be engaged as carers to reduce their risk of infection.

Health workforce response – expressions of interest

- Clinical and non-clinical healthcare workers are being asked to express their interest in working within the Victorian health system as part of the response to coronavirus (COVID-19).
- Visit <https://healthworkforceresponse.dhhs.vic.gov.au/>  for more information.

New orders for pharmacists and prescription medications

- During coronavirus (COVID-19), pharmacists can supply prescription medications without a prescription for one month in emergency circumstances except for Schedule 8 medicines.
- Doctors prescribing Schedule 8 medicines for non-drug dependent patients will not be required to apply for a Schedule 8 treatment permit for the next six months, but instead check SafeScript.
- Practitioners will need to apply for Schedule 8 treatment permits for drug dependent patients,

including opioid replacement therapy.

- During the pandemic health practitioners should take all reasonable steps to access SafeScript, as it is a very effective in providing up-to-date information about a patient's prescribing and dispensing history.
- Two new public health emergency orders have come into effect and can be found here: <http://www.gazette.vic.gov.au/gazette/Gazettes2020/GG2020S158.pdf> ↗
