Coronavirus COVID-19 daily update

[Print](#)  [Share](#) 

This Chief Health Officer update is intended to provide clinicians and the Victorian public with information about the number of confirmed cases of COVID-19 in Victoria as well as relevant public health response activities in Victoria. Chief Health Officer Alerts will continue to be issued when there are changes to the public health advice related to COVID-19.

22/04/2020

What's new?

Developments in the outbreak

- As of 22 April 2020, the total number of coronavirus (COVID-19) cases in Victoria is 1,336 – no net increase from yesterday.
- This total does however reflect two new cases being added, and two existing cases being reclassified to another state as per protocol.
- 29 people are in hospital, including 12 people in intensive care. 15 people have died. 135 cases have an unknown source of infection, a decrease of 3 since yesterday. 1,243 people have recovered. More than 90,000 Victorians have been tested.
- Of the total 1,336 cases, there have been 1,057 in metropolitan Melbourne and 242 in regional Victoria. A number of cases remain under investigation.
- There have been 163 confirmed cases in healthcare workers (unchanged since yesterday), across at least 7 hospitals and 1 radiology clinic.
- A total of 44 cases are reported in people in mandatory hotel quarantine (unchanged since yesterday).
- The total number of cases in Australia is currently 6,645.
- Up-to-date [epidemiological data](#)  is available on our website.

Current advice to clinicians

- Victoria's public and private hospitals will begin doing more elective surgeries from next week.
- Category 2 and some category 3 elective surgeries will gradually resume from 27 April 2020.
- Surgeries that will be allowed include IVF procedures, post-cancer reconstruction procedures, eye procedures and cataracts, endoscopy and colonoscopy procedures, some dental procedures, joint replacements including knee, hip and shoulder and screening programs for cancer and other diseases. It also includes all procedures for children under the age of 18.
- The Department of Health and Human Services is working with health services and staff in both the private and public systems to assess their surgical capacity and ability to increase procedures, when it is safe to do so.
- Upon reopening, priority will be given to the patients of highest need, based on surgical advice of the hospital where the surgery is scheduled. Elective surgery patients should not call their hospitals but should wait until the hospital notifies them.
- Pregnant healthcare workers should be considered potentially vulnerable, particularly from 28 weeks gestation, and should be encouraged to follow the standard advice to protect themselves against COVID-19, such as good hand hygiene and physical distancing practices.
- Pregnant healthcare workers should also be encouraged to have the seasonal influenza vaccine, as this will help to prevent them and their baby from catching influenza.

Key messages for the community

- The rules are clear - Stay home. Protect the health system. Save lives.
- There are only four reasons to leave home:
 - shopping for what you need - food and essential supplies
 - medical, care or compassionate needs
 - exercise in compliance with the public gathering requirements
 - work and study if you can't work or learn remotely.

Current directions arising from the declared state of emergency

The State of Emergency in Victoria has been extended until midnight 11 May 2020.

The current directions remain in place and include: staying at home, restrictions on particular activities, detention, restrictions on airports and cruise ships, aged care, hospitals and isolation for people diagnosed with COVID-19.

More information viewed at the department's [website](#). The site also contains a page of [frequently asked questions](#) providing further guidance on the directions.
