Coronavirus (COVID-19) daily update

[Print](#)  [Share](#) 

This Chief Health Officer update is intended to provide clinicians and the Victorian public with information about the number of confirmed cases of coronavirus (COVID-19) in Victoria as well as relevant public health response activities in Victoria. Chief Health Officer Alerts will continue to be issued when there are changes to the public health advice related to coronavirus (COVID-19).

01/07/2020

What's new?

- As of 1 July 2020, the total number of coronavirus (COVID-19) cases in Victoria is 2,231 an increase of 72 since yesterday's report.
- Of the 73 new cases today, nine cases are linked to outbreaks, 19 were identified through routine testing, and 42 remain under investigation. One previous case has been reclassified.
- 301 cases have been acquired in Australia where the source of infection is unknown.
- 15 people are in hospital, including 2 patients in intensive care. 20 people have died, no increase since yesterday's report. 1,839 people have recovered.
- Of the total 2,231 cases, there have been 1,890 in metropolitan Melbourne and 252 in regional Victoria. Several cases remain under investigation.
- More than 830,000 test results have been received by the department since 1 January 2020.
- Further details can be found in today's [coronavirus \(COVID-19\) media release](#).
- Up-to-date [epidemiological data is available on our website](#).
- Updates have been made to the [health services and professionals section](#) of our website for improved usability and content navigation.
- From 28 June 2020, all returned travellers in hotel quarantine to must participate in testing

for coronavirus on day 11 to be eligible for release after 14 days. Those who refuse to be tested will be required to remain in quarantine for an additional 10 days – 24 in total - to ensure they pose no risk of introducing coronavirus to the Victorian community.

- Victoria will commence limited saliva testing in hotspots as part of department-led enhanced surveillance activities. Nasopharyngeal swabs collected by trained healthcare workers remains the gold standard test.

Restricted postcodes

Given the increasing numbers of coronavirus (COVID-19) in particular locations and the heightened risk of transmission, additional restrictions will be applied to certain postcodes.

From 1 July 2020 at 11:59pm, residents in one of these restricted postcodes must follow Stay at Home Directions. There are four reasons that these residents can leave home:

- Shopping for food or other essential items
- Work or study, if they cannot work or study from home
- To provide care giving, for compassionate reasons or seek medical treatment
- For exercise (outdoor exercise only, with only one other person or members of their household).

The restricted postcodes are:

- 3012 – includes: Brooklyn, Kingsville, Maidstone, Tottenham, West Footscray
- 3021 – includes the following suburbs: Albanvale, Kealba, Kings Park, St Albans
- 3032 – includes the following suburbs: Ascot Vale, Highpoint City, Maribyrnong, Travancore
- 3038 – includes the following suburbs: Keilor Downs, Keilor Lodge, Taylors Lakes, Watergardens
- 3042 – includes the following suburbs: Airport West, Keilor Park, Niddrie, Niddrie North
- 3046 – includes the following suburbs: Glenroy, Hadfield, Oak Park
- 3047 – includes the following suburbs: Broadmeadows, Dallas, Jacana
- 3055 – includes the following suburbs: Brunswick South, Brunswick West, Moonee Vale, Moreland West
- 3060 – includes the following suburbs: Fawkner
- 3064 – includes the following suburbs: Craigieburn, Donnybrook, Mickleham, Roxburgh Park, Kalkallo

Suburban testing blitz

- A targeted blitz launched this week across ten priority suburbs to zero-in on community transmission with a fleet of mobile vans.
- Over 10 days, residents of these suburbs will receive free testing – with or without symptoms. Priority suburbs include Keilor Downs, Broadmeadows, Maidstone, Albanvale, Sunshine West, Hallam, Brunswick West, Fawkner, Reservoir and Pakenham, with Keilor Downs and Broadmeadows identified as the focus of the next three days of testing.

- Residents of these suburbs who do not have symptoms should not seek testing from their GP, rather they should visit a site listed on our [Getting tested webpage](#).
- People getting tested in hotspots who are asymptomatic and awaiting test results do not need to self-isolate. In line with existing guidance, if people feel unwell or have any of the coronavirus (COVID-19) symptoms they should self-isolate.

Current advice to clinicians

- Practitioners should test any patients who meet the clinical criteria below

Fever OR chills in the absence of an alternative diagnosis that explains the clinical presentation*

OR

Acute respiratory infection (e.g. cough, sore throat, shortness of breath, runny nose, anosmia or loss of smell or loss of taste)

Note: In addition, testing is recommended for people with new onset of other clinical symptoms consistent with COVID-19** AND who are close contacts of a confirmed case of COVID-19; who have returned from overseas in the past 14 days; or who are healthcare or aged care workers.

**Clinical discretion applies including consideration of the potential for co-infection (e.g. concurrent infection with SARS-CoV-2 and influenza)*

***headache, myalgia, stuffy nose, nausea, vomiting, diarrhoea*

- If referring your patients for coronavirus (COVID-19) testing, a list of testing locations can be found on the [getting tested for coronavirus page](#).
- Any coronavirus (COVID-19) test reported by a laboratory as having detected SARS-CoV-2 on PCR will be treated as positive for the purposes of public health actions, regardless of repeat testing of the sample. It is not appropriate to advise a patient that a test is a false positive. Current processing time for coronavirus (COVID-19) tests is one to three days.
- Practitioners are encouraged to also consider testing for other infectious diseases as warranted by the patient's clinical presentation and history, including travel history. Test for influenza in patients presenting with compatible respiratory symptoms and request a stool culture in patients presenting with gastrointestinal symptoms.

Key messages for the community

- For 10 days starting Thursday 25 June, if you live in one of the priority suburbs you will receive free testing – with or without symptoms. For more information on the Suburban Testing Blitz go to the [Response to outbreaks page](#).
- Asymptomatic people getting tested in hotspots during this time do not need to self-isolate while waiting for test results.
- If you feel unwell with any symptoms of coronavirus (COVID-19), however mild, you should stay home and get tested. If you have any fever, chills, cough, sore throat, shortness of breath, runny nose, and loss of sense of smell or taste – stay home, don't go in to work and don't visit

friends and family. Get tested and stay at home until you get the result. [Go to the DHHS testing map for locations.](#)
