Coronavirus (COVID-19) daily update

[Print](#)  [Share](#) 

This Chief Health Officer update is intended to provide clinicians and the Victorian public with information about the number of confirmed cases of coronavirus (COVID-19) in Victoria as well as relevant public health response activities in Victoria. Chief Health Officer Alerts will continue to be issued when there are changes to the public health advice related to coronavirus (COVID-19).

26/12/2020

What's new?

- Victoria has recorded no new case of coronavirus (COVID-19) since yesterday. There were no new cases recorded on 25 December 2020.
- This is the 57th consecutive day where Victoria has recorded no new community transmission cases.
- The total number of coronavirus (COVID-19) cases reported in Victoria is now 20,361 including those in hotel quarantine.
- Today's 14-day average case number for metropolitan Melbourne and regional Victoria is zero.
- There were no new deaths and the state's death toll stands at 820.
- The total number of cases from an unknown source in the last 14 days is zero for metropolitan Melbourne and zero for regional Victoria. 3,762 cases may indicate community transmission (no change since yesterday's report).
- There are 10 active cases in Victoria, this includes one case acquired interstate and nine in hotel quarantine, 19,531 people have recovered.
- A total of 3,835,438 test results have been received. This is an increase of 4,907 since yesterday.
- You can find further details in today's [coronavirus \(COVID-19\) media release](#).

- The DHHS website has full details in the [interactive daily report](#).

Testing sites over Christmas

- Coronavirus (COVID-19) testing remains one of the best ways we can keep people safe and stay open, so we're asking anyone with symptoms to come and get tested - regardless of the time of year.
- There will be reduced capacity of some testing sites over the Christmas break until 2 January, including reduced hours for some Community health service-led testing sites.
- However, in excess of 60 testing sites will remain open throughout the summer break, including some sites open on Christmas Day.
- Testing sites will also be operating in the popular summer destinations at Torquay, Lorne, and the Mornington Peninsula.
- Testing site details, including opening hours, are available on the [Where to get tested page](#)

Visitors from or those returning from New South Wales

- Victoria's border with New South Wales is closed and no one who has been in the Northern Beaches area, Greater Sydney or the NSW Central Coast from 11 December is allowed to come into Victoria.
- A [permit system is now in place](#) for people travelling from or through regional New South Wales to Victoria.
- Victorians are strongly advised not to travel to Sydney as you may not be able to re-enter without undertaking hotel quarantine for 14 days.
- Anyone trying to enter Victoria from the Northern Beaches and exposure sites (hot zone) and Greater Sydney and the Central Coast (red zone) will not be permitted to enter.
- Those travelling from regional NSW (green zone) are asked to monitor for symptoms.
- Fitted face masks are now mandatory when in airport terminals and is strongly recommended to wear a mask on your flight.
- If you think you or a may have been exposed or have been to these locations, then please contact the Department on 1800 675 398. We will ensure that anyone who has been exposed to this outbreak - regardless of whether you normally live in Victoria, NSW or elsewhere - is supported to safely and appropriately self-isolate and get tested.
- NSW Health are continually updating their [high-risk exposure sites](#) and we will advise the Victorian community accordingly.
- Victoria continues to work closely with NSW Health in response to an outbreak in NSW to ensure any people who have visited high-risk locations in the state immediately get tested and self-isolate.

Face masks

- Under [COVIDSafe Summer restrictions](#), there is a requirement to carry a mask at all times.
- From 11:59pm 6 December, masks are required in a limited number of places: on public

transport, in rideshare vehicles and taxis, in some retail settings including indoor shopping centres, supermarkets, department stores and indoor markets.

- Fitted face masks are now mandatory when in airport terminals and is strongly recommended to wear a mask on your flight.
- While masks are no longer mandated in most circumstances, they continue to be recommended indoors or outdoors when distancing can't be maintained.

Wastewater monitoring continues in more than 60 locations

- Low levels of viral fragments have been detected in samples taken this week at wastewater treatment plants in Castlemaine and Corio, and in sub-catchments of the Colac sewage system.
- It is likely people who have recovered from coronavirus (COVID-19) and are no longer infectious are continuing to shed the virus. We have seen similar patterns in multiple locations across the state and we expect this to continue. It is not a cause for concern.
- As always, it remains vitally important that any Victorians with any coronavirus (COVID-19) symptoms, no matter how mild, stay home and get tested.

Current advice to clinicians

- Clinicians should be asking patients if they are from or if they have been in New South Wales and if so, to check the areas of risk defined by the NSW Government and recommended actions.
- [Statement on Rapid Antigen Testing for SARS-CoV-2 \(COVID-19\) diagnosis in symptomatic persons.](#)
- Notifications to the department of a confirmed diagnosis of coronavirus (COVID-19) can be done online. You can submit an [online form](#) to our public health team, rather than calling us, saving you time and resolving your case load more efficiently.
- The department continues to ask commercial passenger vehicle drivers and food delivery drivers to get tested for coronavirus (COVID-19). If commercial passenger vehicle drivers and food delivery drivers do not have any symptoms of coronavirus (COVID-19), they will not have to stay home to wait for their test results. Commercial passenger vehicle drivers and food delivery drivers will need to tell staff at the testing centre/site that they work in the industry.

COVID-19 testing criteria

- Practitioners should test any patients who meet the clinical criteria below:
 - Fever OR chills in the absence of an alternative diagnosis that explains the clinical presentation* OR
 - Acute respiratory infection (e.g. cough, sore throat, shortness of breath, runny nose, or loss or changes in sense of smell or taste)
 - Note: testing is also recommended for people with new onset of other clinical symptoms consistent with coronavirus (COVID-19)** AND who are from the following cohorts: close

contacts of a confirmed case of coronavirus (COVID-19); those who have returned from overseas in the past 14 days; or those who are healthcare or aged care workers. Testing is recommended for those cohorts with onset of other clinical symptoms**.

Asymptomatic testing is not recommended at this stage except for targeted programs

- *Clinical discretion applies including consideration of the potential for co-infection (e.g. concurrent infection with SARS-CoV-2 and influenza)
- **headache, myalgia, stuffy nose, nausea, vomiting, diarrhoea.
- If referring your patients for coronavirus (COVID-19) testing, a list of testing locations can be found on the [getting tested for coronavirus page](#).
- If a symptomatic patient that presents for testing, confirms exposure to a known coronavirus (COVID-19) case within the past 14 days, and the outbreak definition is met, the test sample is to be treated as an 'outbreak sample'.

Victoria's restriction levels

- The State of Emergency has been extended until 3 January 2021 to allow the Chief Health Officer's directions to remain in force.

Key messages for the community

- High risk sites have been reported in the Northern Beaches area of Sydney. People who have attended some sites are required to self-quarantine for 14 days. Any person who has been in Sydney who has symptoms, however mild, should be tested and isolate until a result is available. Exposure sites are listed on the [NSW Health website](#).
- Testing is a critical help to keep numbers down so it's extremely important that if people have [symptoms](#), however mild, they get tested. Go home straight after your test and isolate while you wait for the results. Go to the [testing map](#) for locations.
- [Public exposure sites are listed on the DHHS website](#). If you have visited any of the locations listed during the dates indicated, you should watch for coronavirus (COVID-19) symptoms. If symptoms occur immediately get tested and stay at home while you wait for results.
- COVIDSafe principles apply across Victoria:
 - You must carry a face mask with you when you leave home. You must wear your face mask on public transport, while in taxis or ride share vehicles, or when going to large retail venues, including shopping centres, supermarkets and department stores.
 - Wearing a face mask is strongly recommended in all other situations when you can't keep 1.5 metres distance from other people. Don't go to work if you feel unwell.
 - Maintain a physical distance of 1.5 metres.
 - Cough and sneeze into a tissue or your elbow.
 - Wash hands with soap or use hand sanitiser regularly.
- The [Coronavirus \(COVID-19\) Home Safety Plan \(PDF\) is available](#) for download which tells you what you need to know to help you, your family and friends stay safe and well.

- Many Victorians are feeling fatigued, isolated or lonely. If you are in need of support for your mental health there are [mental health resources](#) you can access on our website.
- If Victorians are not safe at home, they can seek help and support at an [Orange Door](#) or other family violence support service. If you or someone you know is at risk or experiencing family violence, call 000 in an emergency or safe steps 24/7 crisis service on 1800 015 188.
- The [Partners in Wellbeing](#) hotline (1300 375 330) is available for referrals from people who identify as LGBTIQ, multicultural, Aboriginal or Torres Strait Islander people, veterans and people experiencing homelessness.

Clinical information

- [Latest coronavirus \(COVID-19\) information for Victorian health services and general practice.](#)
