Coronavirus (COVID-19) daily update

[Print](#)  [Share](#) 

This Chief Health Officer update is intended to provide clinicians and the Victorian public with information about the number of confirmed cases of coronavirus (COVID-19) in Victoria as well as relevant public health response activities in Victoria. Chief Health Officer Alerts will continue to be issued when there are changes to the public health advice related to coronavirus (COVID-19).

10/2/2021

What's new?

- Victoria has recorded two new cases of coronavirus (COVID-19) since yesterday. A further two cases were reported late today that will be included in tomorrow's numbers, both linked to the Holiday Inn outbreak.
- The total number of coronavirus (COVID-19) cases reported in Victoria is now 20,458.
- There were no new deaths and the state's death toll stands at 820.
- The number of active cases in Victoria is 16, which is made up of five locally acquired cases and 11 cases in returned travellers in hotel quarantine.
- A total of 4,605,765 test results have been received. This is an increase of 22,849 since yesterday.
- You can find further details in today's [coronavirus \(COVID-19\) media release](#).
- The DHHS website has full details in the [interactive daily report](#).

Holiday Inn Melbourne Airport case

- Two further individuals linked to the Holiday Inn Melbourne Airport have tested positive to coronavirus today: a worker, and a previous resident who exited the facility on February 7. The number of cases linked to the Holiday Inn outbreak is now 8.
- Our public health response to this outbreak continues.

- Public exposure sites have been identified and have been published at [Case locations and outbreaks page](#).
- Anyone who has visited the exposure sites during these dates and times must immediately isolate, get tested, and remain isolated for 14 days from the time they were at the site - not just until they receive a negative result.
- Visit the [Where to get tested page](#) to view testing sites nearest you and see real-time waiting information. We thank people for their patience and apologise for any delays.

Grand Hyatt

- The Department is continuing to follow up close contacts of a Hotel Quarantine worker at the Grand Hyatt Hotel who tested positive to coronavirus (COVID-19) on 3 February.

Face masks

- Face masks are mandatory in indoor spaces, including workplaces. If you have visitors in your home, it is strongly recommended that face masks are worn during the visit. Face masks must be worn in indoor spaces apart from when eating or drinking. If you are planning to leave your home – take a face mask.
- In addition to indoor public spaces, face masks continue to be mandatory in the following locations:
 - on public transport
 - when riding in a ride share or taxi
 - on domestic flights to and from Victoria
 - at airports
- You must always carry a face mask with you when you leave home unless you have a lawful reason not to.
- It is strongly recommended you wear one whenever you cannot keep 1.5 metres distance from others.
- There are a number of [lawful reasons to not wear a face mask](#).

Western Australia zone change

- The Perth metropolitan area, the Peel region and the South West region of Western Australia have moved from a red zone to an orange zone under Victoria's 'traffic light' travel permit system.
- People in orange zones can apply for a permit to enter Victoria provided they have not been in close contact with a coronavirus (COVID-19) case and do not have any coronavirus (COVID19) symptoms.
- On arrival in Victoria, orange zone permit holders must isolate at their home or accommodation, get a coronavirus (COVID-19) test, and continue isolating until they have received a negative result.
- Victoria's travel permit system provides the Department of Health the contact details of arrivals from orange and green zone areas, allowing the Department to advise them of any updated directions should the public health situation change in any state.
- To apply for a travel permit to enter Victoria, visit the [Service Victoria website](#).

New South Wales zone changes

- From 6:00pm 8 February, the Cumberland Local Government Area (LGA) in New South Wales will move from an orange zone to a green zone under Victoria's 'traffic light' travel permit system.
- People in green zones may apply for a permit to enter Victoria provided they have not been in close contact with a coronavirus (COVID-19) case and do not have any coronavirus (COVID-19) symptoms. On arrival in Victoria, they must monitor for symptoms and abide by local directions.

Testing sites and expanded testing

- Testing capacity near exposure sites is being enhanced.
- Capacity will also be expanded at other sites and our Rapid Response Testing Team will expand pop up testing, with details to come.
- The department is publishing expected wait times at testing sites as well as updated information about locations and hours of operation at [Where to get tested](#).
- Coronavirus (COVID-19) testing remains one of the best ways we can keep people safe and stay open, so we're asking anyone with symptoms to come and get tested – regardless of the time of year.
- Testing sites are also operating in the popular summer destinations at Torquay, Lorne, and the Mornington Peninsula.
- Testing site details, including new and pop-up testing sites and opening hours, are available at [Where to get tested](#).

Current advice to clinicians

- Clinicians should be asking patients if they are from or if they have been in New South Wales, Western Australia or New Zealand and if so, to check the areas of risk defined by the NSW, WA and NZ governments and recommended actions.
- [Statement on Rapid Antigen Testing for SARS-CoV-2 \(COVID-19\) diagnosis in symptomatic persons](#) (Word).
- Notifications to the department of a confirmed diagnosis of coronavirus (COVID-19) can be done online. You can submit an [online form](#) to our public health team, rather than calling us, saving you time and resolving your case load more efficiently.

COVID-19 testing criteria

- Practitioners should test any patients who meet the clinical criteria below:
 - Fever OR chills in the absence of an alternative diagnosis that explains the clinical presentation* OR
 - Acute respiratory infection (e.g. cough, sore throat, shortness of breath, runny nose, or loss or changes in sense of smell or taste)

- **Note:** testing is also recommended for people with new onset of other clinical symptoms consistent with coronavirus (COVID-19)** AND who are from the following cohorts: close contacts of a confirmed case of coronavirus (COVID-19); those who have returned from overseas in the past 14 days; or those who are healthcare or aged care workers. Testing is recommended for those cohorts with onset of other clinical symptoms**. Asymptomatic testing is not recommended at this stage except for targeted programs
- *Clinical discretion applies including consideration of the potential for co-infection (e.g. concurrent infection with SARS-CoV-2 and influenza)
- **headache, myalgia, stuffy nose, nausea, vomiting, diarrhoea.
- If referring your patients for coronavirus (COVID-19) testing, a list of testing locations can be found on the [getting tested for coronavirus page](#).
- If a symptomatic patient that presents for testing, confirms exposure to a known coronavirus (COVID-19) case within the past 14 days, and the outbreak definition is met, the test sample is to be treated as an 'outbreak sample'.

Victoria's restriction levels

- The State of Emergency has been extended until Friday **26 February 2021** to allow the Chief Health Officer's directions to remain in force.

Key messages for the community

- Testing is a critical help to keep numbers down so it's extremely important that if people have [symptoms](#), however mild, they get tested. Go home straight after your test and isolate while you wait for the results. Go to the [testing map](#) for locations.
- COVIDSafe principles apply across Victoria:
 - Face masks are mandatory in public indoor spaces, except when eating or drinking. If you have visitors in your home, it is strongly recommended that masks are worn during the visit. You must carry a mask when you leave your home.
 - Don't go to work if you feel unwell.
 - Maintain a physical distance of 1.5 metres.
 - Cough and sneeze into a tissue or your elbow.
 - Wash hands with soap or use hand sanitiser regularly.
- The [Coronavirus \(COVID-19\) Home Safety Plan](#) (PDF) is available for download which tells you what you need to know to help you, your family and friends stay safe and well.
- Many Victorians are feeling fatigued, isolated or lonely. If you are in need of support for your mental health there are [mental health resources](#) you can access on our website.
- If Victorians are not safe at home, they can seek help and support at an [Orange Door](#) or other family violence support service. If you or someone you know is at risk or experiencing family violence, call 000 in an emergency or safe steps 24/7 crisis service on 1800 015 188.
- The [Partners in Wellbeing](#) hotline (1300 375 330) is available for referrals from people who identify as LGBTIQ, multicultural, Aboriginal or Torres Strait Islander people, veterans and

people experiencing homelessness.

Clinical information

- [Latest coronavirus \(COVID-19\) information for Victorian health services and general practice](#)
- [Latest information about providing immunisation services during Coronavirus Pandemic](#) (Word)
- [Andrew Wilson, Chief Medical Officer Safer Care Victoria, speaks about the importance of staff completing declarations to consider their health before they start work](#)

Online resources

- Locations of respiratory assessment clinics and testing sites are available [online and through an interactive map](#).
- Find out the latest information about visiting [care facilities](#) and [hospitals](#) on our website.
- [Protecting our healthcare workers](#) (PDF) sets out the very latest in our understanding of coronavirus (COVID-19) and how it can spread within healthcare settings – both hospitals and aged-care facilities. More information can be [found online](#).
- A new [Infection Prevention and Control](#) resource hub is now online, and includes a new factsheet on protective eyewear and the [Guide to the conventional use of PPE](#) (Word). Updated information for health care workers is available online on the [PPE coronavirus page](#).
