Coronavirus (COVID-19) daily update

[Print](#)  [Share](#) 

This Chief Health Officer update is intended to provide clinicians and the Victorian public with information about the number of confirmed cases of coronavirus (COVID-19) in Victoria as well as relevant public health response activities in Victoria. Chief Health Officer Alerts will continue to be issued when there are changes to the public health advice related to coronavirus (COVID-19).

13/2/2021

What's new?

- Victoria has recorded one new locally acquired case of COVID-19.
- The total number of coronavirus (COVID-19) cases reported in Victoria is now 20,466.
- There were no new deaths and the state's death toll stands at 820.
- The number of active cases in Victoria is 20, which is made up of 13 locally acquired cases, an increase of one since yesterday, and 7 cases in returned travellers in hotel quarantine, unchanged since yesterday.
- A total of 4,672,661 test results have been received. This is an increase of 20,116 since yesterday.
- You can find further details in today's [coronavirus \(COVID-19\) media release](#).
- The DHHS website has full details in the [interactive daily report](#).

Holiday Inn Melbourne Airport case

- Yesterday's new positive case linked to the Holiday Inn cases is a social primary close contact of a previously identified positive case who is one of the Holiday Inn workers.
- Over 30 primary close contacts of the new case have been identified, contacted and are currently in isolation. They are being tested today.

- The private function venue, at 426 Sydney Road, Coburg, has been listed as an exposure site. Anyone who visited this location on the above dates and times must isolate, test and remain isolated for 14 days.
- Interviews are underway and known exposure sites will be published online as soon as possible.
- Public exposure sites have been identified and have been published at Case locations and outbreaks.
- Anyone who has visited the exposure sites during these dates and times must immediately isolate, get tested, and remain isolated for 14 days from the time they were at the site - not just until they receive a negative result.
- Visit [Where to get tested page](#) to view testing sites nearest you and see real-time waiting information. We thank people for their patience and apologise for any delays.

Grand Hyatt

- The Department is continuing to follow up close contacts of a Hotel Quarantine worker at the Grand Hyatt Hotel who tested positive to coronavirus (COVID-19) on 3 February.

Update: Circuit-breaker actions

- Victoria's new circuit-breaker actions are now in effect.
- From 11.59pm Friday 12 February until 11.59pm on Wednesday 17 February, you cannot leave your home unless it is for one of four reasons: shopping for necessary goods and services; care and caregiving; exercise; and essential work.
- You must stay within five kilometres of your home. This limit does not apply to work or when giving or receiving care. You can leave your home in an emergency or if there is family violence.
- Face masks must be worn indoors and outdoors whenever you leave your home.
- These important measures are critical to our efforts to limit potential community cases of COVID-19 and to stay on top of our current situation. By limiting movement, we can limit the spread.
- For more information about all the circuit-breaker actions, please visit the [Coronavirus website](#).

Western Australia zone change

- The Perth metropolitan area, the Peel region and the South West region of Western Australia have moved from a red zone to an orange zone under Victoria's 'traffic light' travel permit system.
- People in orange zones can apply for a permit to enter Victoria provided they have not been in close contact with a coronavirus (COVID-19) case and do not have any coronavirus (COVID19) symptoms.
- On arrival in Victoria, orange zone permit holders must isolate at their home or accommodation, get a coronavirus (COVID-19) test, and continue isolating until they have received a negative result.
- Victoria's travel permit system provides the Department of Health the contact details of arrivals from orange and green zone areas, allowing the Department to advise them of any updated directions should the public health situation change in any state.

- To apply for a travel permit to enter Victoria, visit the [Service Victoria website](#).

New South Wales zone changes

- From 6:00pm 8 February, the Cumberland Local Government Area (LGA) in New South Wales will move from an orange zone to a green zone under Victoria's 'traffic light' travel permit system.
- People in green zones may apply for a permit to enter Victoria provided they have not been in close contact with a coronavirus (COVID-19) case and do not have any coronavirus (COVID-19) symptoms. On arrival in Victoria, they must monitor for symptoms and abide by local directions.

Testing sites and expanded testing

- New testing sites and extended hours are regularly updated at [Where to get tested](#). Where possible, please contact testing sites before arrival.
- All up, 20 testing facilities across Melbourne increased their operations yesterday. Hundreds of people were tested at the pop-up sites at Clarke Oval and Goonawarra Rec Reserve.
- The pre-existing testing site at the Sunbury Respiratory Clinic is also operational – supported by larger sites about 20 minutes' drive away in Tullamarine, Broadmeadows and St Albans.
- The department is publishing expected wait times at testing sites as well as updated information about locations and hours of operation at [Where to get tested](#).
- Coronavirus (COVID-19) testing remains one of the best ways we can keep people safe and stay open, so we're asking anyone with symptoms to come and get tested – regardless of the time of year.

Current advice to clinicians

- Clinicians should be asking patients if they are from or if they have been in New South Wales, Western Australia or New Zealand and if so, to check the areas of risk defined by the NSW, WA and NZ governments and recommended actions.
- [Statement on Rapid Antigen Testing for SARS-CoV-2 \(COVID-19\) diagnosis in symptomatic persons](#) (Word).
- Notifications to the department of a confirmed diagnosis of coronavirus (COVID-19) can be done online. You can submit an [online form](#) to our public health team, rather than calling us, saving you time and resolving your case load more efficiently.

COVID-19 testing criteria

- Practitioners should test any patients who meet the clinical criteria below:
 - Fever OR chills in the absence of an alternative diagnosis that explains the clinical presentation* OR
 - Acute respiratory infection (e.g. cough, sore throat, shortness of breath, runny nose, or loss or changes in sense of smell or taste)

- **Note:** testing is also recommended for people with new onset of other clinical symptoms consistent with coronavirus (COVID-19)** AND who are from the following cohorts: close contacts of a confirmed case of coronavirus (COVID-19); those who have returned from overseas in the past 14 days; or those who are healthcare or aged care workers. Testing is recommended for those cohorts with onset of other clinical symptoms**. Asymptomatic testing is not recommended at this stage except for targeted programs
- *Clinical discretion applies including consideration of the potential for co-infection (e.g. concurrent infection with SARS-CoV-2 and influenza)
- **headache, myalgia, stuffy nose, nausea, vomiting, diarrhoea.
- If referring your patients for coronavirus (COVID-19) testing, a list of testing locations can be found on the [getting tested for coronavirus page](#).
- If a symptomatic patient that presents for testing, confirms exposure to a known coronavirus (COVID-19) case within the past 14 days, and the outbreak definition is met, the test sample is to be treated as an 'outbreak sample'.

Victoria's restriction levels

- The State of Emergency has been extended until Friday **26 February 2021** to allow the Chief Health Officer's directions to remain in force.

Mental health resources

- Many Victorians are feeling fatigued, isolated or lonely. If you are in need of support for your mental health there are [mental health resources](#) you can access on our website.
- If Victorians are not safe at home, they can seek help and support at an [Orange Door](#) or other family violence support service. If you or someone you know is at risk or experiencing family violence, call 000 in an emergency or safe steps 24/7 crisis service on 1800 015 188.
- The [Partners in Wellbeing](#) hotline (1300 375 330) is available for referrals from people who identify as LGBTIQ, multicultural, Aboriginal or Torres Strait Islander people, veterans and people experiencing homelessness.

Clinical information

- [Latest coronavirus \(COVID-19\) information for Victorian health services and general practice](#)
- [Latest information about providing immunisation services during Coronavirus Pandemic](#) (Word)
- [Andrew Wilson, Chief Medical Officer Safer Care Victoria, speaks about the importance of staff completing declarations to consider their health before they start work](#)

Online resources

- Locations of respiratory assessment clinics and testing sites are available [online and through an interactive map](#).

- Find out the latest information about visiting [care facilities](#) and [hospitals](#) on our website.
- [Protecting our healthcare workers](#) (PDF) sets out the very latest in our understanding of coronavirus (COVID-19) and how it can spread within healthcare settings – both hospitals and aged-care facilities. More information can be [found online](#).
- A new [Infection Prevention and Control](#) resource hub is now online, and includes a new factsheet on protective eyewear and the [Guide to the conventional use of PPE](#) (Word). Updated information for health care workers is available online on the [PPE coronavirus page](#).

Consumer information
