

GOVERNMENT OF BERMUDA

Health Information

The Epidemiology and Surveillance Unit helps to manage and monitor the status of health in Bermuda by:

- Regularly recording, interpreting, and reporting data that reflect the health of our community;
- Reviewing health problems and outbreaks; this includes chronic diseases, injuries, and social factors that influence health status
- Detecting and monitoring epidemics and public health emergencies.
- Providing health information upon request in a variety of formats.

International alerts:

Coronavirus (COVID-19, formerly 2019-nCoV)

Coronavirus (COVID-19) is a new respiratory illness.

The World Health Organization has declared the current coronavirus situation a Pandemic. Working closely with partner agencies, the Ministry of Health is monitoring this rapidly evolving health situation and will keep the public up to date on Bermuda's response.

Learn more about COVID-19

Ebola

The World Health Organization has declared the Ebola outbreak in the Democratic Republic of the Congo a Public Health Emergency of International Concern. The risk of introduction to Bermuda is low. Travelers to the outbreak area should pay attention to their health during travel and for 21 days following travel; if fever or other symptoms develop, the medical care provider is to be informed of the recent travel prior to attending for medical care.

Local Alerts:

Updated 14th April 2020

The Epidemiology and Surveillance Unit continues to receive reports of fever and respiratory symptoms including influenza. Residents are encouraged to ensure that all vaccinations are current.

The Epidemiology and Surveillance Unit continues to receive reports of gastroenteritis (diarrhea and vomiting illness) including campylobacter

Disease Reporting Forms

We collect health information from various contact points in the community to monitor the health of our Island and identify any concerns. Below are forms for reporting:
