# Coronavirus (COVID-19) update

The current World Health Organization risk assessment for novel coronavirus (COVID-19) is very high risk globally. It is advised that all countries prepare for the possibility of COVID-19 in their communities. Everyone has a role to play in getting ready and staying healthy by practicing everyday prevention measures like frequent hand washing, staying home when sick and covering coughs and sneezes. The World Health Organization has declared the current coronavirus situation as a pandemic. A pandemic is the increased and sustained transmission of a disease across many countries.

Surveillance for respiratory illness has been enhanced in collaboration with local public health partners. Persons with respiratory illness including fever and cough should <u>call ahead</u> and inform their health care provider of their travel history prior to attending for medical care.

This is a rapidly changing situation. Please regularly check this page for updates.

## COVID-19 Dashboard - 9 June 🛓

#### Data as of 3:00 pm 9 June 2020

Port Health Monitoring	Number
Quarantine with public health supervision	292

COVID-19 Testing	Total
Total	8298
Results negative	8157
Results positive	141
Transmission Status of Confirmed Cases	
Imported	41
Local Transmission [Known contact/source]	84
Local Transmission [Unknown contact/source]	11
Under Investigation	5

Status of Confirmed Cases	
Recovered	123
Active (non-hospitalized)	7
Active (hospitalized)	2
Deceased	9

**Quarantine with public health supervision:** All adults entering Bermuda are required to quarantine with public health supervision in a government quarantine facility for 14 days. These individuals will be monitored for symptoms during their time in quarantine. Exemptions allowed to self-quarantine at home for minors and for medical reasons.

**Self-quarantine with public health supervision:** All persons entering Bermuda from 17 March 2020 are to selfquarantine with public health supervision. Health personnel are in communication with these persons over the course of the self-quarantine period having provided a plan for self-monitoring for symptoms and clear instructions for notifying a health care provider before the person seeks health care if they develop fever, cough, or difficulty breathing.

Imported: Cases acquired outside of Bermuda.

Local transmission: Cases acquired within Bermuda

**Under investigation:** Type of transmission has not yet been determined. These cases are not imported and are likely the result of local transmission.

**Recovered:** Person has had no fever for at least 72 hours (3 days) without the use of fever-reducing medication, other symptoms have improved and at least 14 days have passed since onset of symptoms or testing date. Laboratory confirmation of at least one negative result may also be used as evidence of recovery.

Country status: Local transmission.

# **COVID-19 Reopening Indicators**

Bermuda is monitoring critical indicators to see how we are doing in managing COVID-19 and assess our readiness to move to the next phase of our reopening plan. These indicators are updated on Mondays and Thursday.

As of 8th June 2020:

#### Lead Measures

"How Bermuda is doing; monitor bi-weekly to indicate likelihood of movement to the next phase"

#### Lag Measures

"How Bermuda has done so far; to confirm at the end of each phase that it is safe to move to the next phase"

#### Transmission

#### Cases and hospitalizations

	• <12 over last 7 days
	<ul> <li>&gt;35 over last 7 days</li> </ul>

# Coronavirus (COVID-19) Modelling Data - 24 April

The numbers generated through this model cannot be interpreted as predictions of what will occur during the current COVID-19 pandemic. Rather, they should be treated as estimates of what might happen, based on the assumptions used in generating these estimates and the modelling strategy used. The model aims to provide decision makers with potentially useful but heavily caveated information that will be refined as more information becomes available. The point of the model is not to predict the future, it's to influence it, help us prepare for it and choose a good course of action.

Our analyses on COVID-19 infections, hospitalizations, and testing can be found at the links below:
