Latest case counts on novel coronavirus

March 10, 2020

A new coronavirus is causing a respiratory infection known as COVID-19. BC has 39 confirmed cases, however, the risk of the virus spreading remains low.

Confirmed COVID-19 cases

Case counts are based on available information and are subject to change.

Global

For the latest global case counts, please visit the [World Health Organization \(WHO\) Novel coronavirus \(COVID-19\) map](#).

Canada

For the latest Canadian updates, visit the [Public Health Agency of Canada](#) website.

British Columbia

- 39 confirmed cases including:
 - Four individuals who have recovered, as indicated by the resolution of symptoms, followed by two successive negative test results 24 hours apart.
 - One individual who has died.
- 2,008 individuals and 2,803 samples tested as of March 6, 2020.

The number of samples tested will be higher than the number of individuals tested because some individuals are tested more than once.
