Contact **Health Links-Info Santé** at **204-788-8200** or **1-888-315-9257** (toll-free) if you're experiencing symptoms of the 2019 novel coronavirus.

Do not call 911 unless it is an emergency.

## Current Situation

**NEW** Last updated: March 16, 2020

Work is underway to finalize guidelines for health-care workers and critical infrastructure workers who return from international travel to address any impacts on essential services. All physicians, health-care providers and staff returning from international travel **MUST** self-identify to their organization/site's occupational health services.

Effective immediately, only one visitor per patient at a time is allowed in acute care facilities, such as hospitals, across Manitoba. This does not apply to parents of children in hospital. Also, exceptions will be made at a manager's discretion for special circumstances, such as visitors who require an escort or those going to see a patient nearing the end of their life.

There have been reports of multiple phishing scams related to COVID-19. Many are asking people for credit card information to provide medication following a positive test results. This is not a call that Manitobans would receive from public health officials. Manitobans are advised to not provide any financial data, hang up on the call and to report to the Canadian Anti-Fraud Centre at (toll-free) 1-888-495-8501. See latest [COVID-19 bulletin](#) for latest information.
