[COVID-19 Screening Tool - Experiencing symptoms? Take a self-assessment](#)

The online screening tool is now available in an interactive voice response (IVR) format. CALL 1-877-308-9038

It is not a replacement for Health Links-Info Sante. It is specifically for Manitobans who prefer to complete the screening tool by phone rather than online.

The tool asks callers standard screening questions for COVID-19. If needed, it directs those who may require a conversation with a health care professional to Health Links-Info Santé. People who want to self-screen can call 1-877-308-9038.

Contact **Health Links-Info Santé** at **204-788-8200** or **1-888-315-9257** (toll-free) if you're experiencing symptoms of the 2019 novel coronavirus.

Do not call 911 unless it is an emergency.

Current Situation

NEW Last updated: March 22, 2020

Public health officials advise the total number of lab-confirmed positive and probable positive cases in Manitoba remains 19 at this time.

Eleven community testing sites throughout the province are open. The public is reminded that a

referral to these sites are needed and that they are not walk-in clinics. Information on locations and hours of operation are available on the [Community Screening Locations](#) page.

COVID-19 (coronavirus) update

Testing in Manitoba

NEW Last updated: March 21, 2020

As of March 19, 3,801 tests for COVID-19 have been completed.

Total Number of Confirmed and Probable Positive Novel Coronavirus (COVID-19) Cases by Health Region (of residence)::

Total Number of Confirmed and Probable Positive Novel Coronavirus	Manitoba
Confirmed Positive *	11
Probable Positive **	8
Totals	19

Regions	Manitoba	Interlake-Eastern	Northern	Prairie Mountain	Southern Health	Winnipeg	Unknown
Totals	19	2	0	0	2	15	0

- * A confirmed positive case has tested positive at both Cadham Provincial Laboratory and the National Microbiology Laboratory.
- ** A probable positive case has tested positive at Cadham Provincial Laboratory and is awaiting confirmatory

testing results from the National Microbiology Laboratory.

If you have a positive test result, public health officials will call you directly. That is the start of the public health investigation process. In addition, if these public health investigations identify you as a possible close contact, they will call you and provide advice on how to self-monitor for symptoms and self-isolate.

If your test result is negative, it may take longer for you to be advised of your test results. If you have been exposed to COVID-19 through travel or close contact with a case, ensure you self-isolate for 14 days after symptoms develop. If you haven't been exposed to a case or travel, stay home until all your symptoms are gone.

Canadian Situation

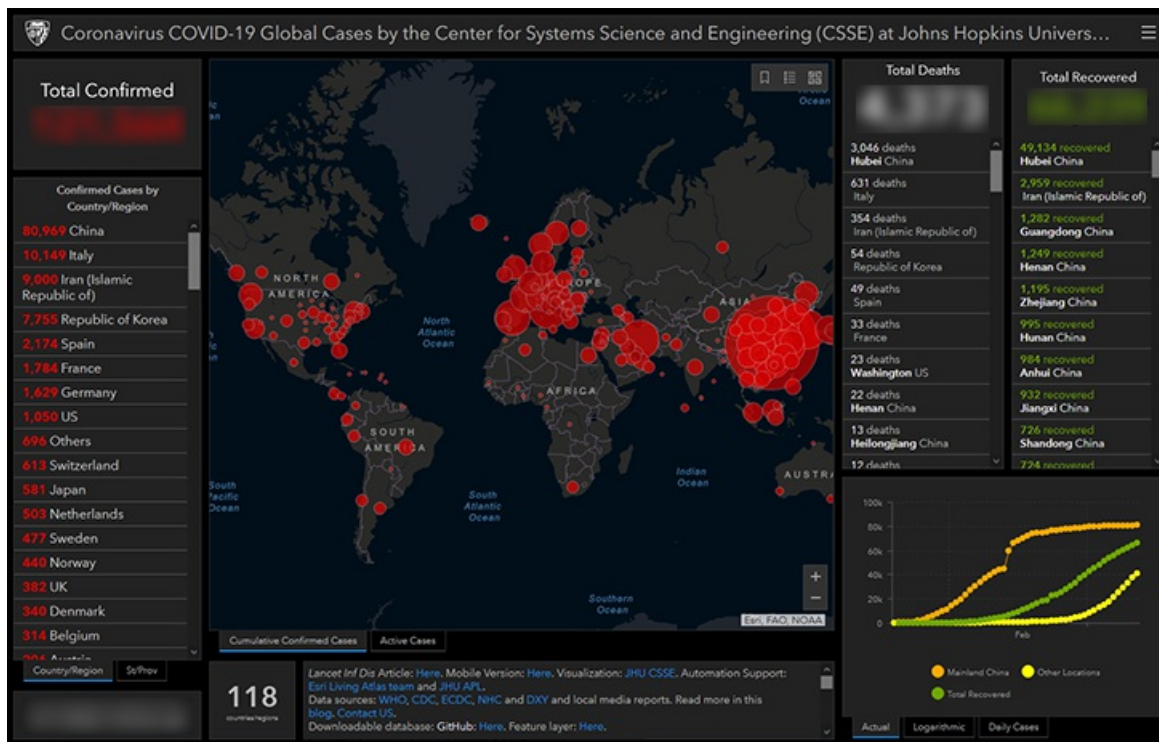

NEW Last updated: March 22, 2020

As of March 21, 2020 (5:00 pm), 1,302 confirmed cases of COVID-19 have been confirmed in Canada. Cases have been reported in Alberta, British Columbia, Manitoba, New Brunswick, Nova Scotia, Ontario, Prince Edward Island, Quebec, Saskatchewan, Newfoundland & Labrador and Northwest Territories. Probable cases have also been reported in New Brunswick, Nova Scotia, Newfoundland & Labrador, Saskatchewan and Quebec. [Public Health Agency of Canada's COVID-19: Outbreak update](#) website.
