[COVID-19 Screening Tool - Experiencing symptoms? Take a self-assessment](#)

The online screening tool is now available in an interactive voice response (IVR) format. CALL 1-877-308-9038

It is not a replacement for Health Links-Info Sante. It is specifically for Manitobans who prefer to complete the screening tool by phone rather than online.

The tool asks callers standard screening questions for COVID-19. If needed, it directs those who may require a conversation with a health care professional to Health Links-Info Santé. People who want to self-screen can call 1-877-308-9038.

Contact **Health Links-Info Santé** at **204-788-8200** or **1-888-315-9257** (toll-free) if you're experiencing symptoms of the 2019 novel coronavirus.

Do not call 911 unless it is an emergency.

Current Situation

NEW Last updated: March 28, 2020

Public health officials advise 25 additional probable cases of COVID-19 have been identified as of 9:30 a.m., bringing the total number of lab-confirmed positive and probable positive cases in Manitoba to 64 at this time. Total number of deaths reported in Manitoba remains at one.

The public is reminded that under The Public Health Act, the following measures will be in place, effective 12:01 a.m. on Monday, March 30. Public gatherings will be limited to no more than 10

people at any indoor or outdoor place or premises. This includes places of worship, gatherings and family events such as weddings and funerals. This does not apply to a facility where health care or social services are provided, including child care centres and homeless shelters. Retail businesses including grocery or food stores, shopping centres, pharmacies or gas stations must ensure separation of one to two metres between patrons assembling in the business. Public transportation facilities must also ensure that people assembling at the facility are reasonably able to maintain a separation of one to two metres.

A community testing site will open Monday, March 30 in Pine Falls at École Powerview School, 33 Vincent St., from 9 a.m. to 4 p.m. Monday to Friday. This brings the total to 15 community testing sites including six drive-thru locations. The public is reminded that a referral to these sites is needed and they are not walk-in clinics. Information on locations and hours of operation are available on the [Community Screening Locations](#) page.

Cases and Risk of COVID-19 in Manitoba

NEW Last updated: March 28, 2020

As of March 25, 6,203 tests for COVID-19 have been completed.

Summary of Persons with COVID-19 in Manitoba

| Regions | Total Cases | Confirmed Positive * | Probable Positive ** | Deaths |
|---------------|-------------|----------------------|----------------------|----------|
| Totals | 64 | 25 | 39 | 1 |

- * A confirmed positive case has tested positive at both Cadham Provincial Laboratory and the National Microbiology Laboratory.
- ** A probable positive case has tested positive at Cadham Provincial Laboratory and is awaiting confirmatory testing results from the National Microbiology Laboratory.

If you have a positive test result, public health officials will call you directly. That is the start of the public health investigation process. In addition, if these public health investigations identify you as a possible close contact, they will call you and provide advice on how to self-monitor for symptoms and self-isolate.

If your test result is negative, it may take longer for you to be advised of your test results. If you have been exposed to COVID-19 through travel or close contact with a case, ensure you self-isolate for 14 days after symptoms develop. If you haven't been exposed to a case or travel, stay home until all your symptoms are gone.

Canadian Situation

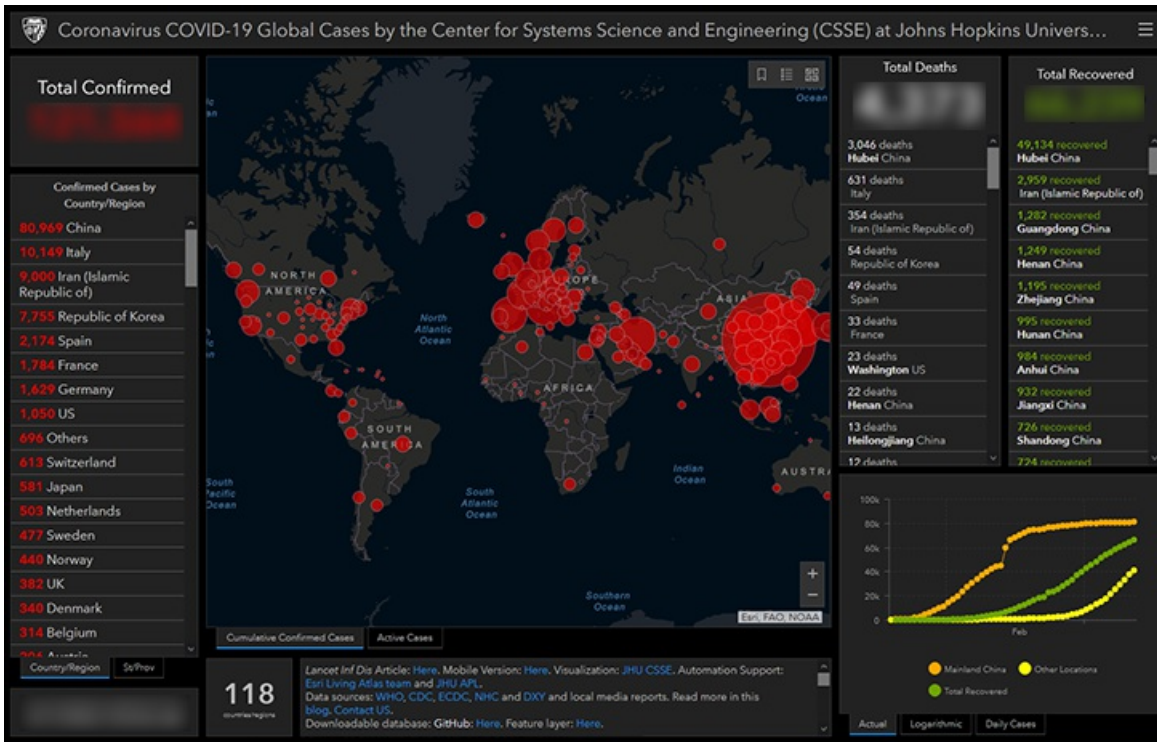

NEW Last updated: March 28, 2020

As of March 27, 2020 (5:00 pm), 4,689 cases and 53 deaths associated with COVID-19 have been confirmed in Canada. Cases have been reported in all provinces and territories across Canada, with the exception of Nunavut. Probable cases have also been reported in Manitoba. Deaths associated with COVID-19 have been reported in Alberta, British Columbia, Ontario, Manitoba and Quebec. [Public Health Agency of Canada's COVID-19: Outbreak update website.](#)
