[COVID-19 Screening Tool - Experiencing symptoms? Take a self-assessment](#)

The online screening tool is now available in an interactive voice response (IVR) format. CALL 1-877-308-9038

It is not a replacement for Health Links-Info Sante. It is specifically for Manitobans who prefer to complete the screening tool by phone rather than online.

The tool asks callers standard screening questions for COVID-19. If needed, it directs those who may require a conversation with a health care professional to Health Links-Info Santé. People who want to self-screen can call 1-877-308-9038.

Contact Health Links-Info Santé at 204-788-8200 or 1-888-315-9257 (toll-free) if you're experiencing symptoms of the 2019 novel coronavirus.

Do not call 911 unless it is an emergency.

Current Situation

NEW Last updated: April 3, 2020

Public health officials advise 15 additional cases of COVID-19 have been identified as of 9:30 a.m., bringing the total number of lab-confirmed positive and probable positive cases in Manitoba to 182. In addition, a second death has been reported. Patient specific details are not being released at this time.

The data also shows:

- nine individuals are currently hospitalized, including six in intensive care;
- 11 individuals have recovered from COVID-19; and
- the total number of deaths reported in Manitoba is two.

The Manitoba government has decided to postpone the remaining dates for making campground reservations. Sessions scheduled for April 6 and April 8 will be rescheduled at a later date. Existing campground, group use, and yurt reservations are still valid, but may be cancelled if the situation changes. More information is available at on the [Manitoba Parks](#) website.

Public health is also advising people to remain within or close to their home communities. This includes limiting travel, even within Manitoba, to essential trips only. Services at smaller health centres could be strained if seasonal visitors become ill.

COVID-19 (Coronavirus) update

Cases and Risk of COVID-19 in Manitoba

NEW Last updated: April 3, 2020 - 1:00 p.m.

As of April 2, 11,952 tests for COVID-19 have been completed.

Summary of Persons with COVID-19 in Manitoba

Regions	Total Cases	Confirmed Positive *	Probable Positive **	Deaths
Interlake-Eastern	9	8	1	0
Northern	2	2	0	0
Prairie Mountain	12	10	2	0
Southern	16	15	1	0
Winnipeg	143	129	14	0
Totals	182	164	18	2

- * A confirmed positive case has tested positive at both Cadham Provincial Laboratory and the National Microbiology Laboratory.
- ** A probable positive case has tested positive at Cadham Provincial Laboratory and is awaiting confirmatory testing results from the National Microbiology Laboratory.

If you have a positive test result, public health officials will call you directly. That is the start of the public health investigation process. In addition, if these public health investigations identify you as a possible close contact, they will call you and provide advice on how to self-monitor for symptoms and self-isolate.

If your test result is negative, it may take longer for you to be advised of your test results. If you have been exposed to COVID-19 through travel or close contact with a case, ensure you self-isolate for 14 days after symptoms develop. If you haven't been exposed to a case or travel, stay home until all your symptoms are gone.

COVID-19 case counts by age/sex

Canadian Situation

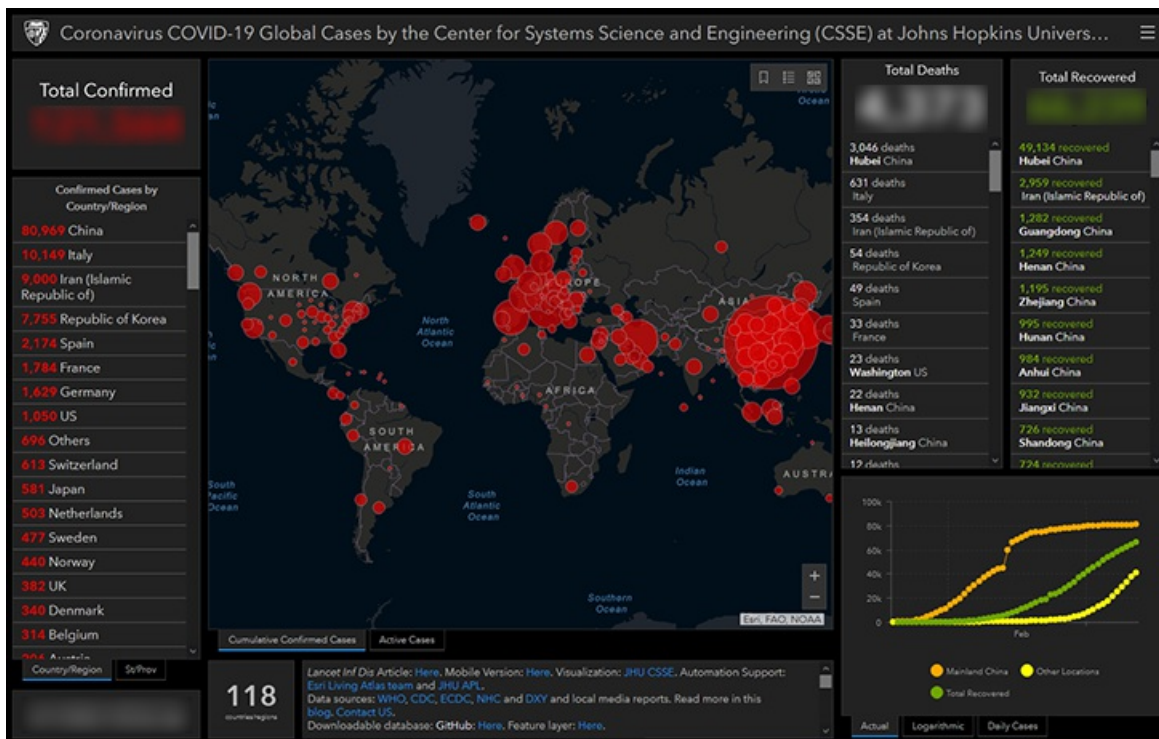

NEW Last updated: April 2, 2020

As of April 3, 2020 (10:00 am), 11,757 confirmed cases, 15 probable cases and 152 deaths associated with COVID-19 have been confirmed in Canada. Cases have been reported in all provinces and territories across Canada, with the exception of Nunavut. Probable cases have also been reported in Manitoba. Deaths associated with COVID-19 have been reported in Alberta, British Columbia, Ontario, Manitoba, Newfoundland and Labrador, Quebec and Saskatchewan.
