### Current Situation

**NEW** Last updated: April 16 2020

Public health officials advise four new cases of COVID-19 were identified as of 9:30 a.m. today, bringing the total number of lab-confirmed positive and probable positive cases in Manitoba to 250.

The data also shows:

- eight individuals are currently hospitalized, which includes four individuals in intensive care;
- 124 active cases and 121 individuals who have recovered from COVID-19; and
- the number of deaths due to COVID-19 remains at five.

The chief provincial public health officer has updated public health orders that take effect on April 17, and will be in effect until May 1, 2020. They mandate that anyone entering Manitoba, regardless of whether it was from another country or another province must self-isolate for 14 days. In addition, travel to northern Manitoba (north of the 53rd parallel of latitude) is prohibited with some exceptions, including:

- residents of northern and remote communities may continue to move within the north;
- delivery of goods and services may continue; and
- exceptions include those who travel to the north for employment, medical treatment or to facilitate child custody agreements.

COVID-19 (Coronavirus) update

## Cases and Risk of COVID-19 in Manitoba

**NEW** Last updated: April 16, 2020 - 1:00 p.m.

As of April 16, 18 349 tests for COVID-19 have been completed.

### Summary of Persons with COVID-19 in Manitoba

| Regions           | Total Cases | Confirmed Positive * | Probable Positive ** | Deaths   |
|-------------------|-------------|----------------------|----------------------|----------|
| Interlake-Eastern | 19          | 17                   | 2                    | 0        |
| Northern          | 3           | 3                    | 0                    | 0        |
| Prairie Mountain  | 12          | 11                   | 1                    | 0        |
| Southern          | 28          | 23                   | 5                    | 0        |
| Winnipeg          | 188         | 185                  | 3                    | 0        |
| <b>Totals</b>     | <b>250</b>  | <b>239</b>           | <b>11</b>            | <b>5</b> |

- \* A confirmed positive case has tested positive at both Cadham Provincial Laboratory and the National Microbiology Laboratory.

- \*\* A probable positive case has tested positive at Cadham Provincial Laboratory and is awaiting confirmatory testing results from the National Microbiology Laboratory.

If you have a positive test result, public health officials will call you directly. That is the start of the public health investigation process. In addition, if these public health investigations identify you as a possible close contact, they will call you and provide advice on how to self-monitor for symptoms and self-isolate.

If your test result is negative, it may take longer for you to be advised of your test results. If you have been exposed to COVID-19 through travel or close contact with a case, ensure you self-isolate for 14 days after symptoms develop. If you haven't been exposed to a case or travel, stay home until all your symptoms have been gone for 24 hours. If you are a health care worker, contact Occupational Health to determine a date of return for work.

## Canadian Situation

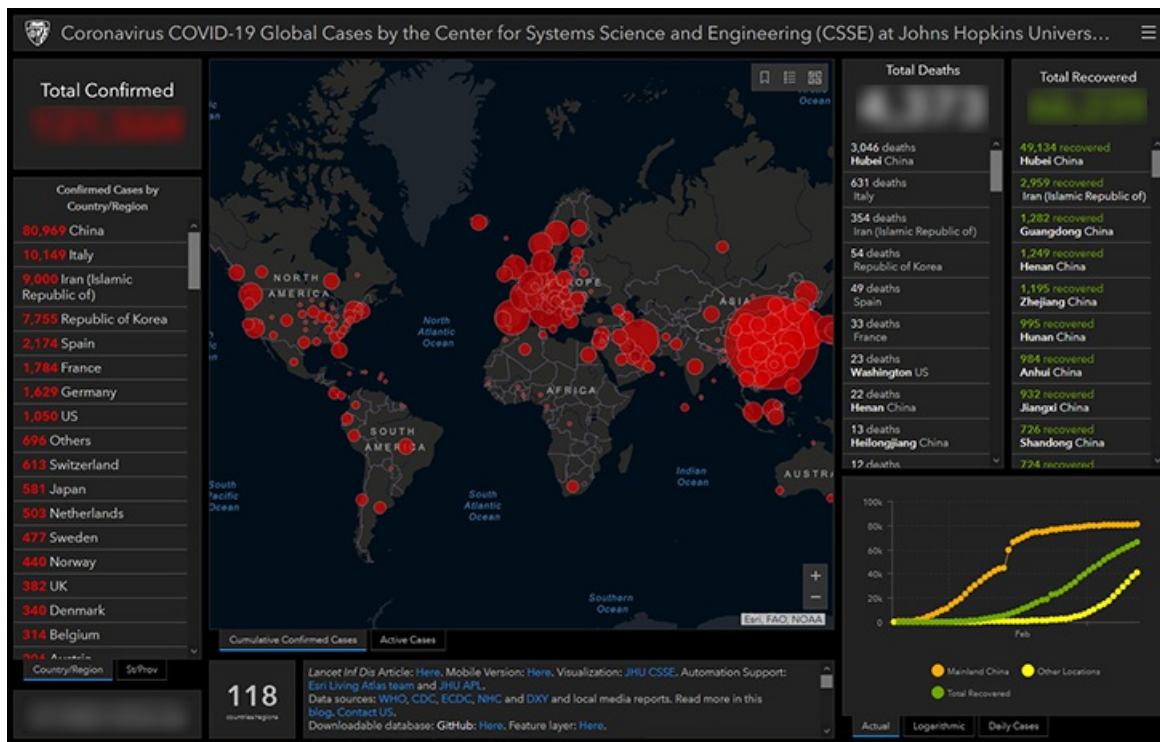

**NEW** Last updated: April 16, 2020

As of April 16, 2020 (10:00 am), 28,884 confirmed cases, 15 probable cases and 1,048 deaths associated with COVID-19 have been confirmed in Canada. Cases have been reported in all provinces and territories across Canada, with the exception of Nunavut. Probable cases have all been reported in Manitoba. Deaths associated with COVID-19 have been reported in Alberta, British Columbia, Ontario, Manitoba, Newfoundland and Labrador, Nova Scotia, Quebec and Saskatchewan.
