### Current Situation

**NEW** Last updated: April 19, 2020

Public health officials advise as of 9:30 a.m. today, the total number of lab-confirmed positive and probable positive cases in Manitoba remains at 253.

The data also shows:

- eight individuals are currently hospitalized, which includes five individuals in intensive care;
- 105 active cases and 143 individuals who have recovered from COVID-19; and
- the number of deaths due to COVID-19 remains at five.

Cadham Provincial Laboratory performed 551 tests on Saturday. A total of 19,744 tests have been performed since early February. Public health officials have expanded testing criteria to include:

- all symptomatic workers or volunteers at workplaces that have been identified as essential services; and
- any symptomatic person who lives with a health care worker, first responder or worker in a congregate

setting such as a correctional facility, shelter, long-term care or residential facility.

## Cases and Risk of COVID-19 in Manitoba

**NEW** Last updated: April 19, 2020 - 1:00 p.m.

## Summary of Persons with COVID-19 in Manitoba

| Regions           | Total Cases | Confirmed Positive * | Probable Positive ** | Deaths   |
|-------------------|-------------|----------------------|----------------------|----------|
| Interlake-Eastern | 17          | 17                   | 0                    | 0        |
| Northern          | 3           | 3                    | 0                    | 0        |
| Prairie Mountain  | 13          | 13                   | 0                    | 0        |
| Southern          | 28          | 23                   | 5                    | 0        |
| Winnipeg          | 192         | 189                  | 3                    | 0        |
| <b>Totals</b>     | <b>253</b>  | <b>245</b>           | <b>8</b>             | <b>5</b> |

- \* A confirmed positive case has tested positive at both Cadham Provincial Laboratory and the National Microbiology Laboratory.
- \*\* A probable positive case has tested positive at Cadham Provincial Laboratory and is awaiting confirmatory testing results from the National Microbiology Laboratory.

If you have a positive test result, public health officials will call you directly. That is the start of the public health investigation process. In addition, if these public health investigations identify you as a possible close contact, they will call you and provide advice on how to self-monitor for symptoms and self-isolate.

If your test result is negative, it may take longer for you to be advised of your test results. If you have been exposed to COVID-19 through travel or close contact with a case, ensure you self-isolate for 14 days after symptoms develop. If you haven't been exposed to a case or travel, stay home until all your symptoms have been gone for 24 hours. If you are a health care worker, contact Occupational Health to determine a date of return for work.

---

## Canadian Situation

**NEW** *Last updated: April 17, 2020*

As of April 16, 2020 (10:00 am), 30,659 confirmed cases, 11 probable cases and 1,250 deaths associated with COVID-19 have been confirmed in Canada. Cases have been reported in all provinces and territories across Canada, with the exception of Nunavut. Probable cases have all been reported in Manitoba. Deaths associated with COVID-19 have been reported in Alberta, British Columbia, Ontario, Manitoba, Newfoundland and Labrador, Nova Scotia, Quebec and Saskatchewan.
