Current Situation

NEW Last updated: April 29, 2020

Public health officials advise one new case of COVID-19 has been identified as of 9:30 a.m. today, bringing the total number of lab-confirmed positive and probable positive cases in Manitoba to 273.

The data also shows:

- five individuals are currently hospitalized, with no individuals in intensive care;
- 54 active cases and 213 individuals who have recovered from COVID-19; and
- the number of deaths due to COVID-19 remains at six.

As of yesterday, an additional 448 laboratory tests were performed. This brings the total number of tests performed since early February to 24,304.

Today, health officials released information about the models developed in Manitoba to inform the management plan for the COVID-19 pandemic in Manitoba. A model for the spread of COVID-19 was created, using data and information available in the scientific literature from other jurisdictions
