Current Situation

NEW Last updated: May 11, 2020

Current Situation

Public health officials advise two new cases of COVID-19 have been identified as of 9:30 a.m. today. The total number of lab-confirmed positive and probable positive cases in Manitoba is 289.

The data also shows:

- four individuals are currently hospitalized, with one individual in intensive care;
- 35 active cases and 247 individuals who have recovered from COVID-19; and
- the number of deaths due to COVID-19 remains at seven.

Over the weekend, two additional cases were added to the workplace cluster in the Prairie Mountain Health region, bringing the total to 10 cases. There is no cause for concern, and this is not unexpected as public health officials continue to investigate and trace contacts. Affected staff and their close contacts are self-isolating, and public health officials are continuing with detailed contact tracing.
