Current Situation

NEW Last updated: May 14, 2020

Current Situation

Public health officials advise no new cases of COVID-19 have been identified as of 9:30 a.m. today. In addition, one case that had been considered probable has been ruled as negative, so the total number of lab-confirmed positive and probable positive cases in Manitoba is 289.

The data also shows:

- four individuals are currently hospitalized, with one individual in intensive care;
- 30 active cases and 252 individuals who have recovered from COVID-19; and
- the number of deaths due to COVID-19 remains at seven.

The probable case that has been removed is one related to the workplace cluster in the Prairie Mountain Health region, which means the total cases in that cluster is reduced to 10.

It is important to note that while some gradual lifting of restrictions has begun, significant work to limit the spread of COVID-19 must continue. Public health is also advising people to remain within or close to their home communities. The request to stay home as much as possible is still in place at this time. This includes limiting travel, even within Manitoba and neighbouring jurisdictions, to

essential trips only. With the long weekend approaching, Manitobans are reminded that travel is not permitted from southern Manitoba to areas, including campgrounds, north of the 53rd parallel. This is essentially anywhere north of the northern end of Lake Winnipeg.

Manitobans experiencing flu or cold-like symptoms no longer require a referral from Health Links-Info Sante or their family physician before heading to a community site for COVID-19 testing. Anyone with symptoms is still encouraged to use the online screening tool to determine whether they meet the necessary criteria to be tested.
