Current Situation

NEW Last updated: May 20, 2020

Current Situation

Public health officials advise no new cases of COVID-19 have been identified as of 9:30 a.m. today. The total number of lab-confirmed positive and probable positive cases in Manitoba is 290.

The data also shows:

- one individual is currently hospitalized, with no individuals in intensive care;
- 23 active cases and 260 individuals who have recovered from COVID-19; and
- the number of deaths due to COVID-19 remains at seven.

The significant efforts taken by Manitobans to reduce the spread of COVID-19 continue to have the desired effect and portions of the Phase 2 re-opening plan can now be implemented. As of Friday, May 22 public health orders will be modified to increase the limit on gathering size to no more than 25 people for indoor premises and 50 for outdoor areas, providing social distancing measures are in place. Other changes such as an expansion of the types of businesses that can re-open are being discussed, and more details will be announced once those decisions are made.

In addition, work is underway to allow limited, outdoor visitation at personal care homes. Individual facilities are putting procedures in place and will be contacting families directly to provide details,

including the start date, locations and hours for visitation. Facilities are expected to have this in place by Friday May 29. This is not a return to normal but does provide a balance between ensuring the health of residents while retaining access to social connections. Enhanced screening will occur upon arrival along with hand hygiene and physical distancing. A maximum of two visitors will be allowed at a time Indoor visits will remain suspended for now, except for compassionate reasons.
