Current Situation

NEW Last updated: July 16, 2020

Public health officials advise that the current five-day test positivity rate is 0.16 per cent and one new case of COVID-19 has been identified as of 9:30 a.m. today. The total number of lab-confirmed positive and probable positive cases in Manitoba is now 331.

The data also shows:

- no individuals are in hospital;
- six active cases and 318 individuals have recovered from COVID-19; and
- the number of deaths due to COVID-19 remains at seven.

An additional 734 tests were completed on Wednesday bringing the total number of tests performed since early February to 73,042.

With summer in full swing now, it's important to remember to maintain physical distancing at the beach too. Standard physical distancing practices should be followed, including two metres or six feet of separation from other beach users outside your family group, and four metres or 12 feet of separation between each group's towels and blankets on the beach to allow for foot traffic to and from the water. More information on guidelines for Manitoba beaches can be found

at www.gov.mb.ca/sd/parks/provincial-park-beaches/index.html.
