COVID-19 Screening Tool - Experiencing symptoms?

[Take a self-assessment](#)

Contact Health Links-Info Santé at 204-788-8200 or 1-888-315-9257 (toll-free) if you're experiencing symptoms of the 2019 novel coronavirus.

Do not call 911 unless it is an emergency.

Current Situation

NEW Last updated: August 14, 2020

Public health officials advise the current five-day COVID-19 test positivity rate is 1.25 per cent. Forty new cases of the virus have been identified as of 9:30 a.m. today. This brings the

total number of lab-confirmed positive and probable positive cases in Manitoba to 643.

The data shows there were:

- 25 new cases in the Prairie Mountain Health region;
- five new cases in Southern Health-Sante Sud; and
- 10 new cases in the Winnipeg region.

Preliminary investigations are ongoing but indicate that the majority of Prairie Mountain Health cases continue to be linked to previously-announced cases in Brandon with early indications of community transmission. Case investigations are ongoing and when they are completed, additional information will be provided as needed to inform of any public health risks.

The data also shows:

- nine current hospitalizations, with three individuals in intensive care;
- 246 active cases and 389 individuals have recovered from COVID-19; and
- the number of deaths due to COVID-19 remains at eight.

Testing numbers show an additional 2,288 laboratory tests were completed on Thursday, bringing the total number of tests completed since early February to 110,492.

Unless recommended by public health, only individuals experiencing COVID-19 symptoms should go for testing. Individuals with symptoms are asked to seek testing as soon as possible once symptoms are present. Employers are asked to only send employees for testing if they have symptoms or if testing has been recommended by public health.

Public health officials are advising of two potential exposure to COVID-19 may have occurred. The first potential exposure was on Aug. 7 at the Sobeys (1570 18th Street) in Brandon and Aug. 10 at the Minnedosa Hospital (334 1st Street).

The second exposure is on Aug. 9 at the Cartwright Town and Country Golf Club (along Highway #3, just west of Cartwright).

While the risk of transmission is considered low, information is being provided to help people assess their risk and seek testing if symptoms appear.
