COVID-19 Screening Tool - Experiencing symptoms?

[Take a self-assessment](#)

Contact Health Links-Info Santé at 204-788-8200 or 1-888-315-9257 (toll-free) if you're experiencing symptoms of the 2019 novel coronavirus.

Do not call 911 unless it is an emergency.

Current Situation

NEW Last updated: August 26, 2020

Public health officials advise the current five-day COVID-19 test positivity rate is 3.1 per cent. Twenty-five new cases of the virus have been identified today as of 9:30 a.m. This brings the

total number of lab-confirmed cases in Manitoba to 1,043.

Of the 25 cases, there were:

- one in Interlake-Eastern Regional Health Authority;
- eight in the Prairie Mountain Health region;
- seven in Southern Health-Santé Sud; and
- nine in the Winnipeg health region.

It is important to note that the trend in current five-day test positive rate is affected by positive results related to targeted testing in known clusters.

One of the new cases identified in Southern Health-Santé Sud is linked to the Bethesda Place personal care home outbreak. This brings the total to eight. Case investigations are ongoing and when they are completed, additional information will be provided as needed to inform of any public health risks.

The data also shows:

- eight current hospitalizations, with one individual in intensive care;
- 408 active cases and 622 individuals have recovered from COVID-19; and
- the number of deaths due to COVID-19 is thirteen.

Public health officials are advising of three potential exposures to COVID-19 that may have occurred. The first was on Aug. 18 and 19 at the GoodLife Fitness (1570-18th St.) in Brandon from 8:00 to 10:00 p.m. on both days and the second was on Aug. 18 at the Coffee Culture Café and Eatery in Brandon (510-1st St.) from 2:00 to 8:00 p.m. The third exposure was on Aug. 11 and Aug. 14 to 17 at the Foxtail Café (Hwy. 10 and Victor Ave.) in Wasagaming. Dates and times will be updated on the website when they are available at manitoba.ca/covid19/updates/flights.html.

While the risk of transmission is considered low, information is being provided to help people assess their risk and seek testing if symptoms appear.

Manitobans are strongly encouraged to return to the fundamentals to help stop the spread of COVID-19. This means not going out while you feel ill, practicing proper hand hygiene, covering your cough and physical distancing when you are with people outside your household. If you can't physical distance, wear a mask.

Testing numbers show an additional 1,206 laboratory tests were completed on Tuesday, bringing the total number of tests completed since early February to 129,409.
