# #RESTART<sup>MB</sup> Pandemic Response System

## Provincial Response Level: RESTRICTED

Community transmission of COVID-19 is occurring. However, the virus is being transmitted at levels that public health and the health system can manage. The Chief Provincial Public Health Officer has set the response level to Orange.

COVID-19 Screening Tool - Experiencing symptoms?

Contact **Health Links-Info Santé** at **204-788-8200** or **1-888-315-9257** (toll-free) if you're experiencing symptoms of the 2019 novel coronavirus.

Do not call 911 unless it is an emergency.

### Current Situation

**NEW** Last updated: November 5, 2020

Public health officials advise four additional deaths due to COVID-19 have been reported today, including:

- A female in her 50's from the Southern Health-Sante-Sud region;
- A female in her 70s from the Winnipeg region and linked to the outbreak at Victoria Hospital;
- A male in his 70's from the Winnipeg region and linked to the Victoria Hospital outbreak; and
- A female in her 80's from the Winnipeg region and linked to the outbreak at St. Boniface Hospital.

The current five-day COVID-19 test positivity rate is 8.9 per cent and 427 new cases of the virus have been identified as of 9:30 a.m. However, a case was removed as it was from out of province. This brings the total net new cases to 426 and the total lab-confirmed cases in Manitoba to 7,177. The test positivity rate in Winnipeg is 9 per cent. Officials advise this number does not reflect the situation in other parts of the province, as cases continue to be identified outside Winnipeg.

Today's data shows:

- 15 cases in the Prairie Mountain Health region;
- 32 cases in the Interlake-Eastern health region;
- 60 cases in the Northern health region;
- 55 cases in the Southern Health-Santé Sud health region; and
- 265 cases in the Winnipeg health region.

The data also shows:

- 4,166 active cases and 2,920 individuals who have recovered from COVID-19;
- there are 153 people in hospital and 16 people in intensive care; and
- the number of deaths due to COVID-19 is 91.

Laboratory testing numbers show 4,055 tests were completed yesterday, bringing the total number of lab tests completed since early February to 272,901. Case investigations continue and if a public health risk is identified, the public will be notified.
