COVID-19 SELF-ASSESSMENT

Before calling 811 use this self-assessment tool to help determine whether you should be tested for COVID-19. You can complete this assessment for yourself or on behalf of someone else, if they are not able.

Launch self-assessment

If you have symptoms:

- Please do not visit a hospital, physician's office, lab or healthcare facility without consulting 811 first.
- **If you are having difficulty breathing or experiencing other severe symptoms, call 911 immediately. Advise them of your symptoms and travel history.**

Cases and testing

- Zone 6: North East Region (Bathurst) - 258
- Zone 7: Central East Region (Miramichi) - 138

New Brunswick: 3,536

Last updated: March 31st, 2020

*** It is important to note that each individual may have been tested more than once**

As of March 23, 2020: Laboratory testing is done by the Dr. Georges-L.-Dumont University Hospital Centre

Each health zone serves different population numbers, therefore; testing numbers per zone will vary and can't be used as a direct comparison between zones.

Test volumes in each of the health zones reflect the number of citizens with symptoms that:

- met the travel criteria,
- were close contacts of confirmed cases, or
- were healthcare workers who requested a test.

Mental Health and Coping During COVID-19

Actions being taken

New Brunswick's public health officials are carefully monitoring the situation in Canada, and around the world, and are ready to respond.

They are:

- working closely with federal, provincial and territorial partners to share information and assess potential health risks
- ensuring our health system is ready to respond effectively if needed
- ensuring front-line health professionals have information about the virus so they can:
 - take recommended actions
 - promptly report suspected cases to public health officials
 - investigate of persons who may have been exposed and are potentially at risk of developing illness to help prevent spread
