## Nunavut COVID-19 Case Update

May 30, 2021

| Total tests | Total confirmed cases | Total active cases | Total recovered cases | Deaths | Total persons followed | Current persons followed |
|-------------|-----------------------|--------------------|-----------------------|--------|------------------------|--------------------------|
| 15,899      | 648                   | 10                 | 634                   | 4      | 8656                   | 437                      |

For vaccine statistics, click here (<https://www.gov.nu.ca/health/information/covid-19-vaccination>)

\*Please note: These numbers change frequently. Every effort is made to keep this information up-to-date and complete but it may not reflect all persons followed or tested.

\*\* Confirmed cases include those meeting the national case definitions. Persons followed includes individuals with specific symptoms and exposures as well as others who are self-monitoring or self-isolated. Not all of these individuals have symptoms or require testing.

\*\*\*There may be a delay reporting attribution and statistics from cases acquired in Southern Canada. 12 cases that were detected out of territory have been attributed to Nunavut. This includes 3 deaths. Not all NU residents with COVID-19 detected out of territory will be attributed to Nunavut.

\*\*\*\*Total vaccine doses administered is updated as regularly as possible but might be lower than the actual count.

The Government of Nunavut is actively monitoring the COVID-19 situation nationally and globally.
