

the 1990s, the number of people in the world who are poor has increased from 1.1 billion to 1.5 billion. The number of people who are extremely poor has increased from 600 million to 800 million.

There are a number of reasons for this. One is that the world population has increased from 5 billion to 6 billion. Another is that the world economy has not grown fast enough to keep pace with the population increase.

There are also a number of reasons why the world economy has not grown fast enough. One is that the world is not using its resources efficiently. Another is that the world is not investing enough in education and health care.

There are also a number of reasons why the world is not using its resources efficiently. One is that the world is not using its land and water resources wisely. Another is that the world is not using its energy resources wisely.

There are also a number of reasons why the world is not investing enough in education and health care. One is that the world is not spending enough on education. Another is that the world is not spending enough on health care.

There are also a number of reasons why the world is not spending enough on education and health care. One is that the world is not spending enough on education. Another is that the world is not spending enough on health care.

There are also a number of reasons why the world is not spending enough on education and health care. One is that the world is not spending enough on education. Another is that the world is not spending enough on health care.

There are also a number of reasons why the world is not spending enough on education and health care. One is that the world is not spending enough on education. Another is that the world is not spending enough on health care.

the 1990s, the number of people in the world who are poor has increased from 1.1 billion to 1.5 billion. The number of people who are extremely poor has increased from 600 million to 800 million.

There are two main reasons for this. First, the world population has increased from 5 billion to 6 billion. Second, the income of the world's poor has not increased as fast as the income of the world's rich.

The second reason is the main one. The income of the world's rich has increased by 50% since 1980. The income of the world's poor has increased by only 10%.

The income of the world's rich has increased because they have been able to take advantage of the new technologies and the new markets that have opened up in the 1990s. The income of the world's poor has not increased because they have not been able to take advantage of these opportunities.

There are two main reasons for this. First, the world's poor have not been able to get the same education and training as the world's rich. Second, the world's poor have not been able to get the same access to capital and credit as the world's rich.

The world's poor have not been able to get the same education and training because they have not been able to afford it. The world's poor have not been able to get the same access to capital and credit because they have not been able to provide the collateral that lenders require.

The world's poor have not been able to provide the collateral that lenders require because they do not have any assets. The world's poor have not been able to provide the collateral that lenders require because they do not have any assets.

The world's poor have not been able to provide the collateral that lenders require because they do not have any assets. The world's poor have not been able to provide the collateral that lenders require because they do not have any assets.

The world's poor have not been able to provide the collateral that lenders require because they do not have any assets. The world's poor have not been able to provide the collateral that lenders require because they do not have any assets.

The world's poor have not been able to provide the collateral that lenders require because they do not have any assets. The world's poor have not been able to provide the collateral that lenders require because they do not have any assets.

The world's poor have not been able to provide the collateral that lenders require because they do not have any assets. The world's poor have not been able to provide the collateral that lenders require because they do not have any assets.

The world's poor have not been able to provide the collateral that lenders require because they do not have any assets. The world's poor have not been able to provide the collateral that lenders require because they do not have any assets.

The world's poor have not been able to provide the collateral that lenders require because they do not have any assets. The world's poor have not been able to provide the collateral that lenders require because they do not have any assets.

The world's poor have not been able to provide the collateral that lenders require because they do not have any assets. The world's poor have not been able to provide the collateral that lenders require because they do not have any assets.

The world's poor have not been able to provide the collateral that lenders require because they do not have any assets. The world's poor have not been able to provide the collateral that lenders require because they do not have any assets.

The world's poor have not been able to provide the collateral that lenders require because they do not have any assets. The world's poor have not been able to provide the collateral that lenders require because they do not have any assets.

The world's poor have not been able to provide the collateral that lenders require because they do not have any assets. The world's poor have not been able to provide the collateral that lenders require because they do not have any assets.

The world's poor have not been able to provide the collateral that lenders require because they do not have any assets. The world's poor have not been able to provide the collateral that lenders require because they do not have any assets.

The world's poor have not been able to provide the collateral that lenders require because they do not have any assets. The world's poor have not been able to provide the collateral that lenders require because they do not have any assets.

The world's poor have not been able to provide the collateral that lenders require because they do not have any assets. The world's poor have not been able to provide the collateral that lenders require because they do not have any assets.

the 1990s, the number of people in the world who are poor has increased. The number of people who live on less than \$1 a day has increased from 1.1 billion in 1981 to 1.5 billion in 1998.

There are a number of reasons for this. One is that the world population has increased. The number of people in the world has increased from 5 billion in 1981 to 6 billion in 1998. This means that there are more people who need to be fed and clothed and housed.

Another reason is that the world economy has not grown as fast as it should. The world economy has grown by 1.5% per year since 1981. This is a very slow rate of growth. It means that there is not enough money to create enough jobs for all the people who need them.

A third reason is that the world's resources are being used up. The world's forests are being cut down. The world's fish stocks are being depleted. The world's water supplies are being polluted. This means that there are fewer resources available to support the world's population.

There are a number of things that we can do to help solve these problems. We can reduce our consumption of resources. We can use energy more efficiently. We can recycle our waste. We can support fair trade. We can help to create jobs in the developing world.

It is our responsibility to help solve these problems. We have the resources and the technology to do so. We just need the will to do it.

Let us work together to create a better world for all of us. Let us work together to create a world where everyone has enough to eat and drink and wear. Let us work together to create a world where everyone has a chance to live a decent life.

Let us work together to create a world where everyone has a chance to make a difference. Let us work together to create a world where everyone has a chance to be a part of something great.

Let us work together to create a world where everyone has a chance to be a part of the solution. Let us work together to create a world where everyone has a chance to be a part of the future.

Let us work together to create a world where everyone has a chance to be a part of the dream. Let us work together to create a world where everyone has a chance to be a part of the hope.

Let us work together to create a world where everyone has a chance to be a part of the love. Let us work together to create a world where everyone has a chance to be a part of the peace.

Let us work together to create a world where everyone has a chance to be a part of the justice. Let us work together to create a world where everyone has a chance to be a part of the freedom.

Let us work together to create a world where everyone has a chance to be a part of the dignity. Let us work together to create a world where everyone has a chance to be a part of the respect.

Let us work together to create a world where everyone has a chance to be a part of the compassion. Let us work together to create a world where everyone has a chance to be a part of the empathy.

Let us work together to create a world where everyone has a chance to be a part of the understanding. Let us work together to create a world where everyone has a chance to be a part of the tolerance.

Let us work together to create a world where everyone has a chance to be a part of the acceptance. Let us work together to create a world where everyone has a chance to be a part of the inclusion.

Let us work together to create a world where everyone has a chance to be a part of the unity. Let us work together to create a world where everyone has a chance to be a part of the harmony.

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion.

As a result of the demographic changes, the number of people in the world who are 65 years of age and older is expected to increase from 250 million in 1990 to 500 million in 2025.

The demographic changes are also expected to increase the number of people in the world who are 15 years of age and younger from 1.1 billion in 1990 to 1.5 billion in 2025.

The demographic changes are also expected to increase the number of people in the world who are 65 years of age and older from 250 million in 1990 to 500 million in 2025.

The demographic changes are also expected to increase the number of people in the world who are 15 years of age and younger from 1.1 billion in 1990 to 1.5 billion in 2025.
