No. of deaths\*

8

No. of presumptive deaths

3

Number recovered

69

\*There are 8 in total and 1 death in hospital

The positive results are a result of infections acquired in UK, France, Tenerife, Mainland Spain, Germany, Austria, Switzerland, Jersey and Guernsey.

### **Hospital Cases**

There are currently 8 patients being managed within the PEH with COVID-19. No patients are currently requiring intensive care support.

### **Deaths**

Eight confirmed COVID-19 deaths – COVID-19 positive on laboratory testing / throat swab.

Three presumptive COVID-19 deaths – no laboratory testing or negative laboratory testing, but cause of death thought to be COVID-19 related.

### **Demographics**

On 13th April, an analysis of the 219 confirmed cases showed that:

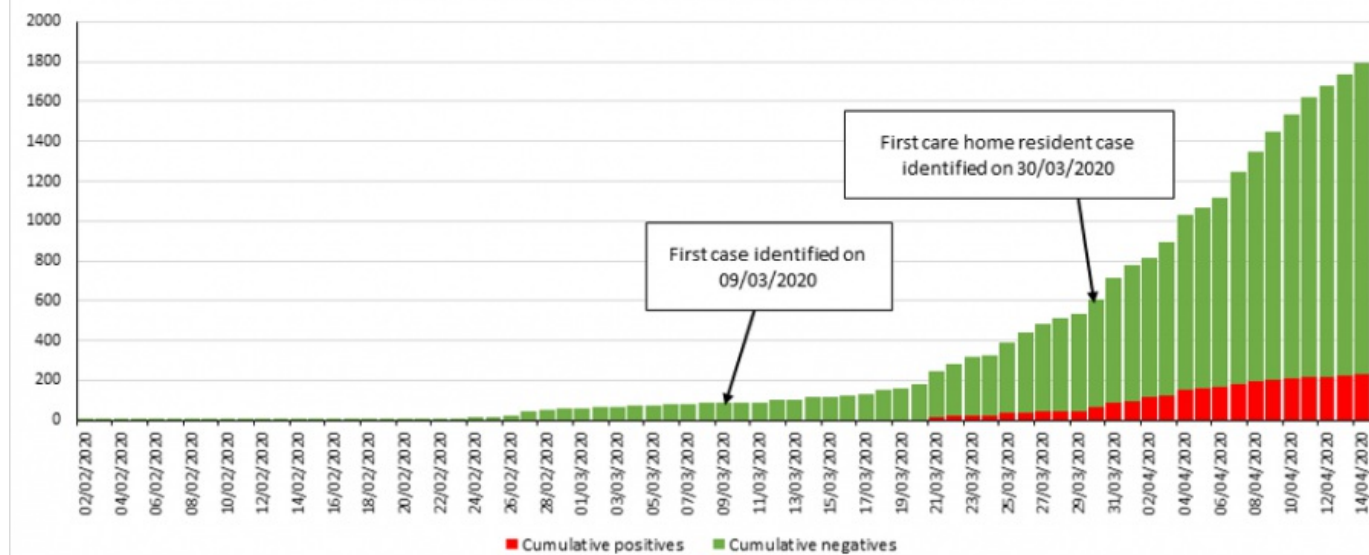

- 62% of cases were among females; 38% among males;
- Infections have been recorded in individuals aged from 0 to 99;
- 96% of infections have been in adults aged 18 and over; 4% have been among children under age 18.

### **Recovered**

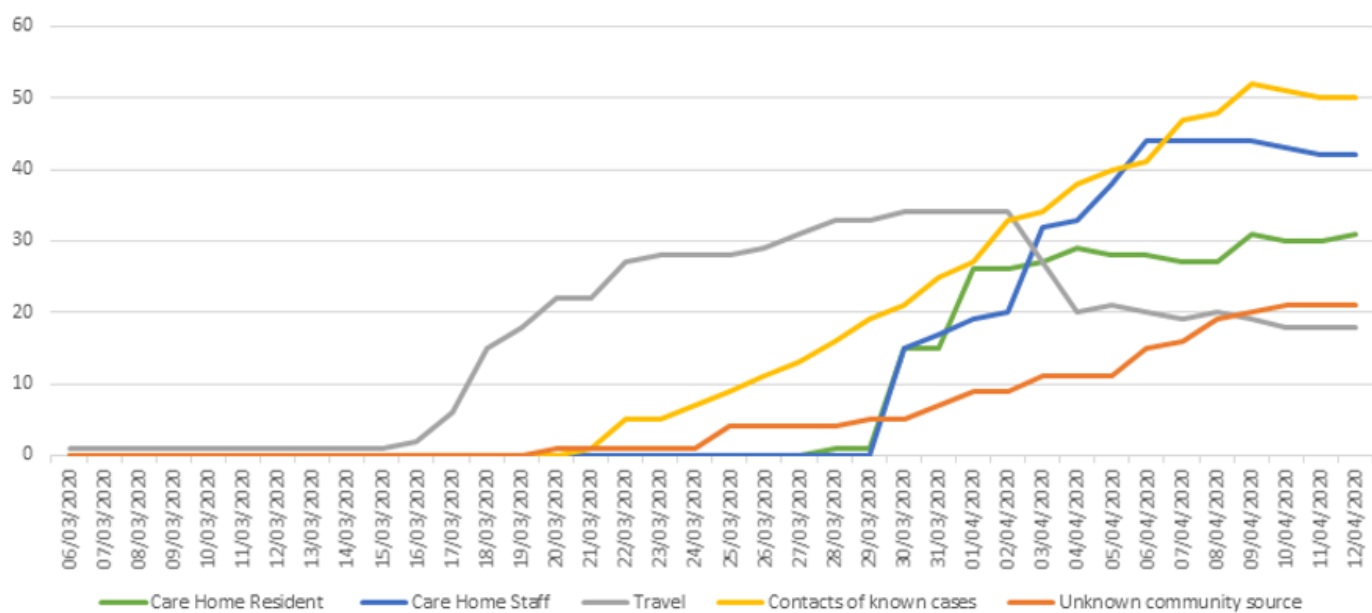

We are defining recovery as having no virus detectable on their nose/throat swab on Day 14.

69 people with proven COVID-19 have been confirmed to have recovered from COVID-19 and have no virus detectable on their nose/throat swab.
