 Likely uncontrolled progression

 DHSC planning assumptions

 Optimal social distancing

 Three day average

 Actual cases

The graph shows the daily confirmed cases and the projected infection rates for a best case scenario compared to a likely uncontrolled progression.

# Cases in the Isle of Man

As at 4pm on 24 December 2020

Cases in the Isle of Man

 New cases

 Total cases

 Active cases

The above chart shows active cases, new cases and total confirmed cases in the Isle of Man from the start of the coronavirus pandemic and how the Island is progressing through each phase.

## Borders (all ports)

As part of Isle of Man Government response to COVID-19 pandemic, a Borders Framework has been developed to reduce the spread and transmission of COVID-19 infection.

See [Borders Framework](#) for current restrictions in place.

## Businesses

Any legal requirement for social distancing in our community was removed on 15 June. Businesses are no longer legally required to take steps in relation to social distancing, such as encouraging employees to work from home, or limiting the number of customers in shops.

COVID-19 will remain a risk for some time and you must manage this risk in the same way you would manage any other risk to your staff or customers, in line with Health & Safety legislation. You may wish to continue to implement some enhanced hygiene and social distancing measures should this be deemed an appropriate and proportionate way to manage risks.

See: [New guidance for businesses](#)

## Hospitals

Visiting restricted.

See: [Visiting Policy](#)

## Schools

All school sites are open as normal.
