Government measures

1. The Basic Policies

On February 25, “Basic Policies for Novel Coronavirus Disease Control” decided by the Headquarters for Novel Coronavirus Disease Control. This policy summarizes the measures that are currently being taken and the perspectives of possible future measures to be taken to respond to future development.

[Basic Policies for Novel Coronavirus Disease Control](#)[151KB]

On March 2, Government Officials and Experts held a press conference on the case of the coronavirus at the Ministry of Foreign Affairs of Japan. Conducted by:

SAHARA Yasuyuki Senior Assistant Minister for Global Health, Minister's Secretariat, Ministry of Health, Labour and Welfare

SUZUKI Tadaki M.D., Ph.D. Director, Department of Pathology, National Institute of Infectious Diseases

OSUMI Yo Deputy Director-General/ Deputy Assistant Minister, Consular Affairs Bureau, Ministry of Foreign Affairs

KAMOSHIDA Naoaki Assistant Press Secretary/ Director, International Press Division, Minister's Secretariat, Ministry of Foreign Affairs

INATSU Toshinobu Immigration Services Agency/ Deputy Director, Border Management Division

NODA Hiroyuki M.D., Ph.D. Councilor, Coordination Office of Measures on Emerging Infectious Diseases Office for Pandemic Influenza and Infectious Diseases Preparedness and Response, Cabinet Secretariat

Please refer to the YouTube video as follows;

YouTube video:[Basic Policies for Prevention and Control of the Novel Coronavirus](#)

2. Understanding the situation of infection

By notification by physicians under the Infectious Diseases Control Law, grasp suspected disease carrier and conduct examination if it is deemed necessary by physicians.

If carrier is confirmed, conduct active epidemiological investigation based on the law and identify those who have been in close contact with the infected person.

For those who have been in close contact with infected person, the measures for preventing from spreading infection are being conducted by requesting to monitor own health condition and to refrain from leaving residence, etc..

We decided to apply medical insurance to the PCR test (on March 6). This makes it possible for medical institutions to request directory to private laboratories without going through public health centers, and further utilization of the examination capabilities of private laboratories will be achieved.

【Press Conference】 The case of the coronavirus

On March 10, Government Officials held a press conference on the case of the coronavirus at the Ministry of Foreign Affairs of Japan.

Conducted by:

SAHARA Yasuyuki Senior Assistant Minister for Global Health, Minister's Secretariat, Ministry of Health, Labour and Welfare

SAITO Tomoya Director, Department of Health Crisis Management, National Institute of Public Health, Ministry of Health, Labour and Welfare

SUDA Toshiyuki Director, Environmental Health and Food Safety Planning Division, Pharmaceutical Safety and Environmental Health Bureau, Ministry of Health, Labour and Welfare

TAGUCHI Kazuho Director, Office of Global Health Cooperation, International Affairs Division, Minister's Secretariat, Ministry of Health, Labour and Welfare

SHIMADA Shiho Director, Regional Medical Care Office, Regional Medical Care Planning Division, Health Policy Bureau, Ministry of Health, Labour and Welfare

KATO Takuma Director, Measures on Novel Influenza Control Office, Ministry of Health, Labour and Welfare

UMEHARA Yoshihiro Deputy Director, Inspection Division, Immigration Services Agency

NODA Hiroyuki M.D., Ph.D. Councilor, Coordination Office of Measures on Emerging Infectious Diseases, Cabinet Secretariat

OZAKI Sotaro, Counsellor, Embassy of Japan in South Africa (Consular Affairs Bureau, Ministry of Foreign Affairs)

KAMOSHIDA Naoaki Assistant Press Secretary / Director, International Press Division, Minister's Secretariat, Ministry of Foreign Affairs

Figure 4:  [Screenshot_COVID19Map_MHLW](#)  [1,848KB]

Figure 5:  [Immigration Control and Refugee Recognition Act](#)  [120KB]

3. Measures for preventing outbreaks

In Japan, sporadic cases of small numbers of patients have been observed.

At this stage, the spread of infection can be prevented by tracing the route of transmission, especially for close contacts.

The important thing is to minimize the spread of infection in the country by preventing one cluster of patients from creating another cluster.

Please refer to the handout below;

4. Border Control Measures

In order to prevent 2019-nCoV from entering Japan via foreign aircraft and ships and take necessary measures related to aircraft, etc., in the Ministry of Health, Labour and Welfare classifies 2019-nCoV infection as “Type of infectious disease of Quarantine law article 34”. This means that government is able to take measures such as inquiry and medical consultation for people entering Japan from abroad, isolation and detention of patients, disinfection for aircrafts, etc.

Based on the epidemic of this infection in other countries, as a border control measure in Japan, for arriving flights and ships from some countries, take measures to reduce the risk of domestic secondary infections by interviewing for all passengers using questionnaires, calling for self-reports by displaying posters, distributing health cards.

In the meantime, foreigners who have stayed in some areas of some countries within 14 days will be refused entering Japan under the Immigration Control and Refugee Recognition Act, with or without symptoms, unless there are special circumstances.

Anyone who has boarded an airplane or ships arriving from China or republic of Korea and not be isolated or stopped is required to stay 14 days at a location designated by the quarantine station chief and not to use public transportation in Japan. (from March 9)

Message to the people in Japan

1.Characteristics of new coronavirus infections ascertained at present (As of February 25)

<The routes of transmission>

The routes of transmission are generally through droplets and contacts. It is not thought to be caused by airborne infections.

In addition, under certain circumstances, such as when talking to many people at a short distance in confined spaces, there is the risk of spreading the infection even without coughing or sneezing.

<About infectivity>

Infectivity varies from case to case. There have been suspected cases which spread the infection to many people. Meanwhile, there are many cases where the virus did not transmit to those surrounding the infected person.

<Common symptoms and risk of developing severe>

Often, fevers or respiratory symptoms may persist for around one week, and many patients complain of strong fatigue. It has been reported that the period of hospitalization tends to be longer than that of seasonal influenza.

Those infected often present only mild symptoms, which will heal in many cases. The severity of the novel coronavirus disease is not as great as infectious diseases with extremely high mortality rates, but it does have the higher risk than seasonal influenza. The risks of developing severe symptoms are particularly high among the elderly and patients with underlying diseases.

2.Prevention Measures and Guide of Consultation

It is important to wash your hands frequently and to cover your mouth and nose with a tissue, or with the crook of your arm if a tissue is unavailable, when coughing or sneezing. To protect yourself and others from the virus, just as you do for the common cold or the flu. We strongly recommend everyday preventive actions to help keep the virus from spreading.

If you have any of the following symptoms, please consult with the consultation center for people with potential exposure to COVID-19:

- You have had cold symptoms or a fever of 37.5°C or over for four days or more.

(including when you need to continue to take an antipyretic)

- You have a strong feeling of weariness (fatigue) or shortness of breath (difficulty breathing).

* Please also consult with the consultation center if you are a senior citizen or have an underlying disease, and you have had the symptoms mentioned above for about two days.

If the consultation center suspects that you have been infected with the virus, it will introduce you to a medical institution where medical

If the consultation center suspects that you have been infected with the virus, it will introduce you to a medical institution where medical services for people with potential exposure to COVID-19 are available. Please visit the medical institution, wearing a facemask, and refrain from using public transportation.

Prevention Measures against Coronavirus Disease 2019 (COVID-19)

About COVID-19

- Common symptoms and risk of developing serious illness.
- Often, fevers or respiratory symptoms may persist for around one week, and many patients complain of strong fatigue.**
- Those infected often present only mild symptoms, which will heal in many cases. The severity of the novel coronavirus disease is not as great as infectious diseases with extremely high mortality rates, but it does have the higher risk than seasonal influenza. **The risks of developing severe symptoms are particularly high among the elderly and patients with underlying diseases.**
- The routes of transmission
- The routes of transmission are generally through droplets and contacts. It is not thought to be caused by airborne infections.
- In addition, under certain circumstances, such as when talking to many people at a short distance in confined spaces, there is the risk of spreading the infection even without coughing or sneezing.

Precautions in daily life

- First of all, **washing hand** is important. Wash your hands frequently with soap or alcohol when you return home, before or after cooking, before eating, etc.
- When you have symptoms such as coughs and sneezes, please cover your mouth and nose. If you cover coughs and sneezes with your hands and touches objects around you with those hands, there is a chance of spreading virus via those objects, please observe the **"coughing etiquette"**.
- Seniors and persons with chronic diseases are advised to take extra precaution and avoid visiting packed places** and using public transportation as much as possible.
- Do not go to office or school, especially if you have symptoms such as fever.** If you have cold symptoms such as fever, measure and record fever everyday.
