

Even though the government began implementing a gradual deconfinement since 20 April, this does not mean that there is no longer a risk of contamination with the virus. Indeed, as long as there is no effective treatment or vaccine, we will have to learn to live with the virus. This is why you must continue to limit your outings, respect barrier gestures and wear a [mask](#) whenever it is not possible to keep a distance of two metres from people who do not live with you under the same roof.

The gradual deconfinement is based on three principles:

- responsibility of everyone,
- solidarity towards others and vulnerable people in particular,
- discipline, which consists of rigorously following the barrier gestures.
