Note: This table shows the number of tests, and some people are tested more than once.

Cases by ethnicity

Cases of COVID-19 by ethnicity

Ethnicity*	Active (confirmed and probable)	Recovered	Deceased	Total cases since first case	Percentage of all cases
Māori	1	191	5	197	8.3%
Pacific peoples	3	185	1	189	8%
Asian	31	420	0	451	19%
Middle Eastern, Latin American and African (MELAA)	9	88	2	99	4.2%

Unknown	3	10	0	13	0.5%
Total	65	2285	26	2376	100%

* The prioritised ethnicity classification system is used in this table and below. This means each person is allocated to a single ethnic group, based on the ethnic groups they identify with. Where people identify with more than one group, they are assigned in this order of priority: Māori, Pacific Peoples, Asian, and European/Other. So, if a person identifies as being Māori and New Zealand European, the person is counted as Māori. See [Ngā tapuāe me ngā raraunga: Methods and data sources](#) for further information.

The data categorized by ethnicity come from National Health Index (NHI) data collection, linked to data held in the EpiSurv database.
