## COVID-19 and ethnicity

### Total cases and tests by ethnicity

|                 | Total cases since first NZ case | Total tests for COVID-19 to date |
|-----------------|---------------------------------|----------------------------------|
| Māori           | 202                             | 266,575                          |
| Pacific peoples | 191                             | 226,434                          |
| Asian           | 541                             | 303,272                          |
| European/other  | 1,555                           | 1,022,003                        |
| Unknown         | 12                              | 84,631                           |
| Total           | 2,501                           | 1,902,915                        |

**Note:** This table shows the number of tests, and some people are tested more than once.

### Cases by ethnicity

#### Cases of COVID-19 by ethnicity

| Ethnicity*                                         | Active (confirmed and probable) | Recovered   | Deceased  | Total cases since first case | Percentage of all cases |
|----------------------------------------------------|---------------------------------|-------------|-----------|------------------------------|-------------------------|
| Māori                                              | 1                               | 196         | 5         | 202                          | 8.1%                    |
| Pacific peoples                                    | 2                               | 188         | 1         | 191                          | 7.6%                    |
| Asian                                              | 48                              | 493         | 0         | 541                          | 21.6%                   |
| Middle Eastern, Latin American and African (MELAA) | 4                               | 99          | 2         | 105                          | 4.2%                    |
| European or Other                                  | 12                              | 1420        | 18        | 1450                         | 58%                     |
| Unknown                                            | 0                               | 12          | 0         | 12                           | 0.5%                    |
| <b>Total</b>                                       | <b>67</b>                       | <b>2408</b> | <b>26</b> | <b>2501</b>                  | <b>100%</b>             |

\* The prioritised ethnicity classification system is used in this table and below. This means each person is allocated to a single ethnic group, based on the ethnic groups they identify with. Where people identify with more than one group, they are assigned in this order of priority: Māori, Pacific Peoples, Asian, and European/Other. So, if a person identifies as being Māori and New Zealand European, the person is counted as Māori. See [Ngā tapuāe me ngā raraunga: Methods and data sources](#) for further information.

The data categorized by ethnicity come from National Health Index (NHI) data collection, linked to data held in the EpiSurv database.

## COVID-19 by age and sex

### Cases by age

#### COVID-19 cases by age group

| Age group | Active (confirmed and probable) | Recovered | Deceased | Total cases | Percentage of all cases |
|-----------|---------------------------------|-----------|----------|-------------|-------------------------|
| 0 to 9    | 5                               | 108       | 0        | 113         | 4.5%                    |
| 10 to 19  | 3                               | 221       | 0        | 224         | 9%                      |
| 20 to 29  | 16                              | 581       | 0        | 597         | 23.9%                   |
| 30 to 39  | 29                              | 462       | 0        | 491         | 19.6%                   |
| 40 to 49  | 7                               | 349       | 0        | 356         | 14.2%                   |
| 50 to 59  | 7                               | 343       | 3        | 353         | 14.1%                   |
| 60 to 69  | 0                               | 230       | 3        | 233         | 9.3%                    |
| 70 to 79  | 0                               | 86        | 7        | 93          | 3.7%                    |
| 80 to 89  | 0                               | 24        | 8        | 32          | 1.3%                    |
| 90+       | 0                               | 4         | 5        | 9           | 0.4%                    |
| Total     | 67                              | 2408      | 26       | 2501        | 100%                    |

## Cases by sex

#### Total cases of COVID-19 by sex

| Sex     | Active (confirmed and probable) | Recovered | Deceased | Total cases | Percentage of all cases |
|---------|---------------------------------|-----------|----------|-------------|-------------------------|
| Female  | 25                              | 1251      | 12       | 1288        | 51%                     |
| Male    | 42                              | 1157      | 14       | 1213        | 49%                     |
| Unknown | 0                               | 0         | 0        | 0           | 0%                      |
| Total   | 67                              | 2408      | 26       | 2501        | 100%                    |

## Cases by hospitalisation and intensive care

#### Cases in hospital and in intensive care (ICU) by age

| Age group | Total people hospitalised | Total people in ICU |
|-----------|---------------------------|---------------------|
| 0 to 9    | 1                         | 0                   |
| 10 to 19  | 3                         | 1                   |
| 20 to 29  | 7                         | 1                   |
| 30 to 39  | 17                        | 1                   |

| Age group    | Total people hospitalised | Total people in ICU |
|--------------|---------------------------|---------------------|
| 40 to 49     | 17                        | 3                   |
| 50 to 59     | 28                        | 4                   |
| 60 to 69     | 23                        | 4                   |
| 70 to 79     | 18                        | 4                   |
| 80 to 89     | 8                         | 0                   |
| 90+          | 4                         | 0                   |
| <b>Total</b> | 126                       | 18                  |

#### Cases in hospital and in intensive care by sex

| Sex          | Total people hospitalised | Total people in ICU |
|--------------|---------------------------|---------------------|
| Female       | 65                        | 6                   |
| Male         | 61                        | 12                  |
| <b>Total</b> | 126                       | 18                  |

## Details of past cases

We publish details about every person with COVID-19 (confirmed or probable) in a downloadable spreadsheet below. For privacy reasons, this data only includes:

- Date potential case was notified
- Sex of case
- Age group of case
- DHB where the case lives - listed as "Managed isolation & quarantine" for border cases
- If the case is related to overseas travel

This file covers all cases from 26 February 2020 to 01 April 2021.

[COVID-19 case details through 01 April 2021 \(CSV, 166 KB\)](#)

Researchers can request detailed data on COVID-19 in New Zealand by sending an email to the Ministry of Health COVID-19 Response and Coordination team - [\[email protected\]](#)
