### Cases by ethnicity

#### Cases of COVID-19 by ethnicity

Ethnicity*	Active (confirmed and probable)	Recovered	Decessed	Total cases since first case	Percentage of all cases
	probable)				
Māori	0	203	5	208	7.8%

\* The prioritised ethnicity classification system is used in this table and below. This means each person is allocated to a single ethnic group, based on the ethnic groups they identify with. Where people identify with more than one group, they are assigned in this order of priority: Māori, Pacific Peoples, Asian, and European/Other. So, if a person identifies as being Māori and New Zealand European, the person is counted as Māori. See <u>Ngā</u> <u>tapuae me ngā raraunga: Methods and data sources</u> for further information.

The data categorized by ethnicity come from National Health Index (NHI) data collection, linked to data held in the EpiSurv database.
