### Cases by ethnicity

#### Cases of COVID-19 by ethnicity

	Active (confirmed and			Total cases since	Percentage of all
Ethnicity*	probable)	Recovered	Deceased	first case	cases
Māori	0	203	5	208	7.8%
Pacific peoples	1	198	1	200	7.5%
Asian	7	645	0	652	24.4%
Middle Eastern, Latin American and African (MELAA)	2	122	2	126	4.7%

Total	13	2634	26	2673	100%

<sup>\*</sup> The prioritised ethnicity classification system is used in this table and below. This means each person is allocated to a single ethnic group, based on the ethnic groups they identify with. Where people identify with more than one group, they are assigned in this order of priority: Māori, Pacific Peoples, Asian, and European/Other. So, if a person identifies as being Māori and New Zealand European, the person is counted as Māori. See Ngā tapuae me ngā raraunga: Methods and data sources for further information.

The data categorized by ethnicity come from National Health Index (NHI) data collection, linked to data held in the EpiSurv database.
