## Cases by ethnicity

#### Cases of COVID-19 by ethnicity

•					
	Active (confirmed and			Total cases since	Percentage of all
Ethnicity*	probable)	Recovered	Deceased	first case	cases
Māori	1	203	5	209	7.7%
Pacific peoples	0	199	1	200	7.4%
Asian	9	668	0	677	24.9%
Middle Eastern, Latin American and African (MELAA)	3	128	2	133	4.9%

Total	23	2671	26	2720	100%

<sup>\*</sup> The prioritised ethnicity classification system is used in this table and below. This means each person is allocated to a single ethnic group, based on the ethnic groups they identify with. Where people identify with more than one group, they are assigned in this order of priority: Māori, Pacific Peoples, Asian, and European/Other. So, if a person identifies as being Māori and New Zealand European, the person is counted as Māori. See Ngā tapuae me ngā raraunga: Methods and data sources for further information.

The data categorized by ethnicity come from National Health Index (NHI) data collection, linked to data held in the EpiSurv database.
