### Cases by ethnicity

#### Cases of COVID-19 by ethnicity

	Active (confirmed and			Total cases since	Percentage of all
Ethnicity*	probable)	Recovered	Deceased	first case	cases
Māori	0	205	5	210	7%
Pacific peoples	40	206	1	247	8.3%
Asian	19	782	0	801	26.8%
Middle Eastern, Latin American and African (MELAA)	10	142	2	154	5.1%

Total	93	2873	26	2992	100%

<sup>\*</sup> The prioritised ethnicity classification system is used in this table and below. This means each person is allocated to a single ethnic group, based on the ethnic groups they identify with. Where people identify with more than one group, they are assigned in this order of priority: Māori, Pacific Peoples, Asian, and European/Other. So, if a person identifies as being Māori and New Zealand European, the person is counted as Māori. See Ngā tapuae me ngā raraunga: Methods and data sources for further information.

The data categorized by ethnicity come from National Health Index (NHI) data collection, linked to data held in the EpiSurv database.
