### HEALTH TIP

Protect yourself from COVID-19. Regularly and thoroughly clean your hands with an alcohol-based hand rub or wash them with soap and water. Why? Washing your hands with soap and water or using alcohol-based hand rub kills viruses that may be on your hands.

Department of Health addresses follow up items from generalist in press conference

Following a press conference held on Thursday 24 April 2020 whereby the Department of Health discussed the recent death of a tourist wife of 60, a news item was generated providing misleading information to members of the public.

The news report was considered based on a report received by the media. Upon receipt of the information report by management of the Health Care Agency and Public Health Authority, several discrepancies that require internal follow-up were identified.

Noting that the report distributed under the authority of the Health Care Agency was not completed by an employee of the agency and there was confusion on behalf of the officer in connection of some items used in the report. This includes the incorrect use of the word 'whistleblower' in order to a section. Additionally, some observations made were not supported by appropriate investigations.
